SafeBite Screen Design Reference

October 18, 2026

Screen Index

No.	Screen and purpose
1	Splash — Brand and session initialization
2	Welcome / Onboarding — Introduce SafeBite
3	Create Account — Registration
4	Sign In — Authentication
5	Home Dashboard — Main navigation, shortcuts and offline state
6	Barcode Scanner — Scan, permission, loading, product-found and error states
7	Search Products — Product-card preview, loading, empty, no-match, server-error and offline cached results
8	Product Details — Product identity, scrollable analysis, loading, not-tested, insufficient-data and expired-cache states
9	Full Contaminant Analysis — Measurements, comparisons, scrollable, insufficient-data, cached-result and expired-cache states
10	Heavy-Metal Interpretation — Explain technical results, scrollable content and evidence states
11	Research & Evidence — Sources, studies, reference limits and evidence states, including partial metadata
12	Evidence-Based Alternatives — Eligible alternatives, product layout, loading, network-error and comparison states
13	Product Comparison — Compare selected products, empty selection and service errors
14	AI Food Safety Assistant — Evidence-grounded questions, response generation, network failure, offline state and no-evidence handling
15	Search & Scan History — Review activity, clear history, empty, offline and retrieval-error states
16	Favorites & Watchlist — Saved products, watchlist, empty and offline states
17	Profile & Settings — Account, preferences, sign-out confirmation and offline state
18	Health-Context Consent & Tags — Optional personalization and scrolled view
19	Health-Context Interpretation — Reviewed information, no matching evidence and retrieval error
20	Exposure-Reduction Guidance — Curated guidance, scrolled view and retrieval error

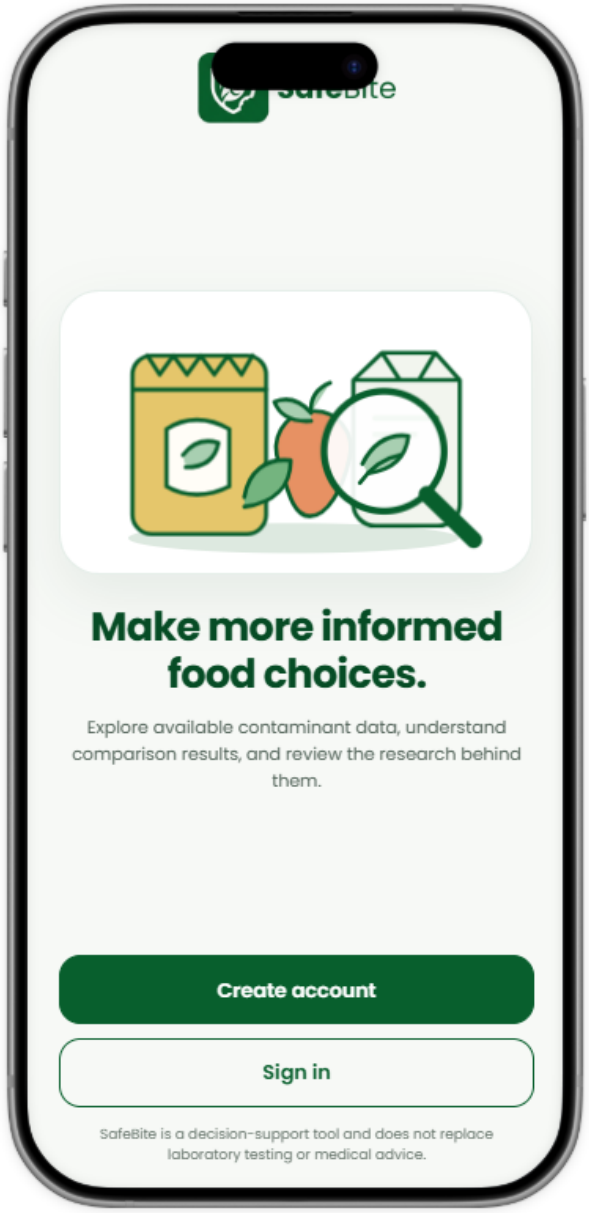

1 Splash

Purpose: Brand and session initialization

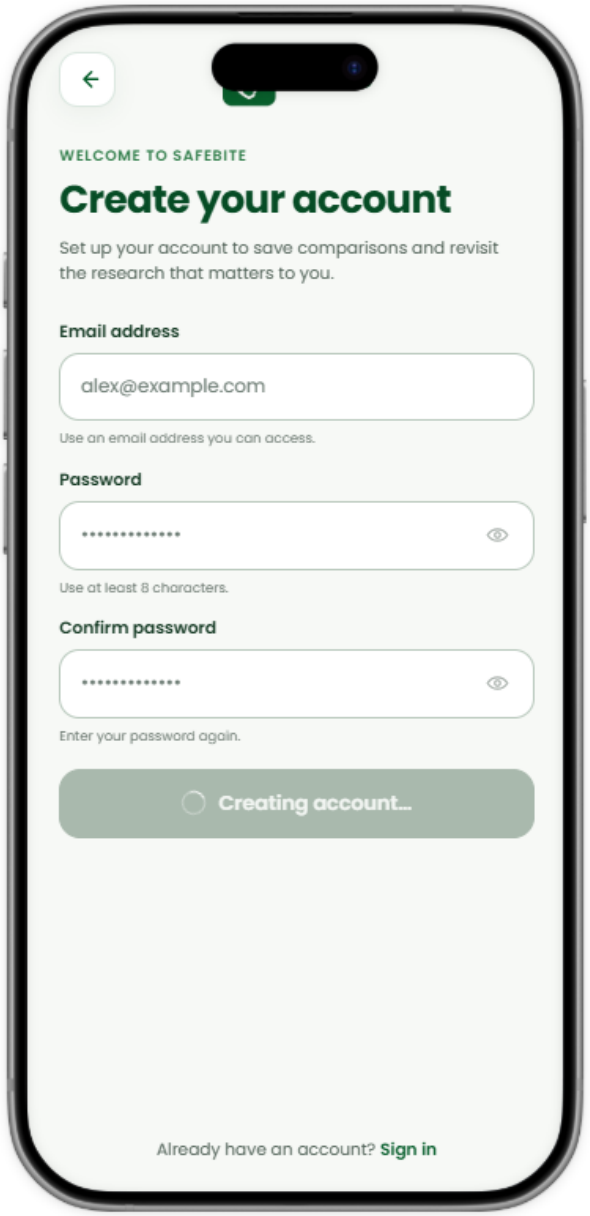

2 Welcome / Onboarding

Purpose: Introduce SafeBite

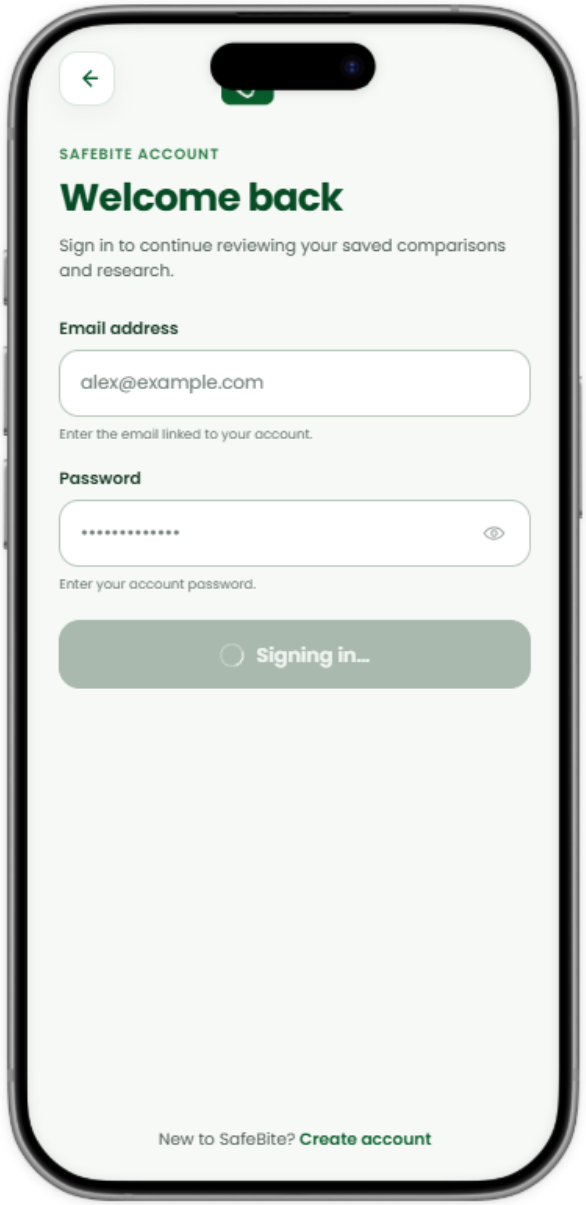

3 Create Account

Purpose: Registration

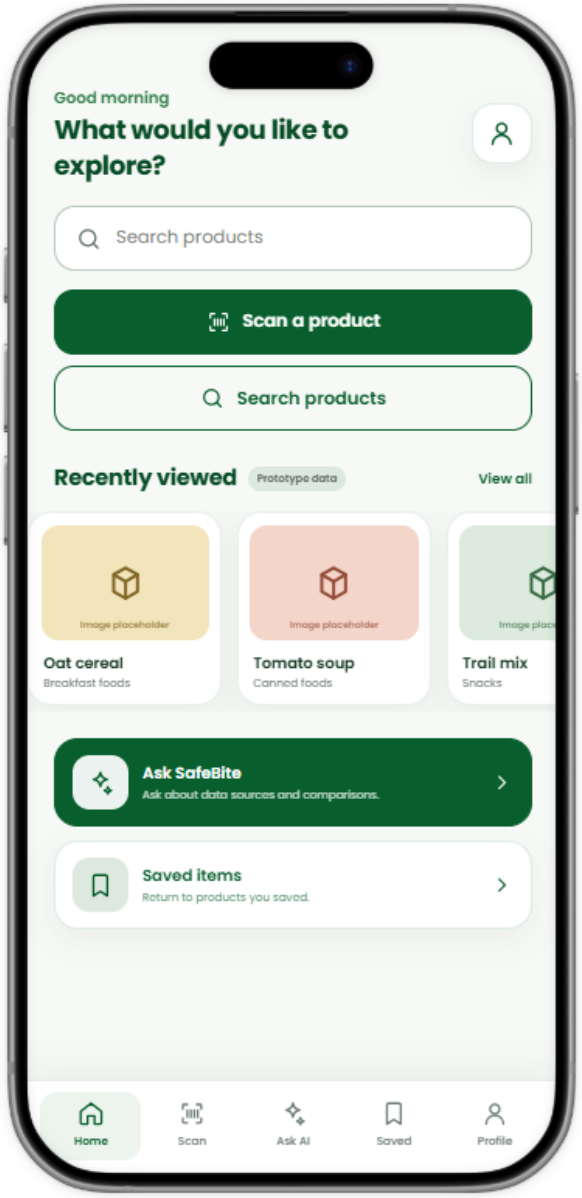

4 Sign In

Purpose: Authentication

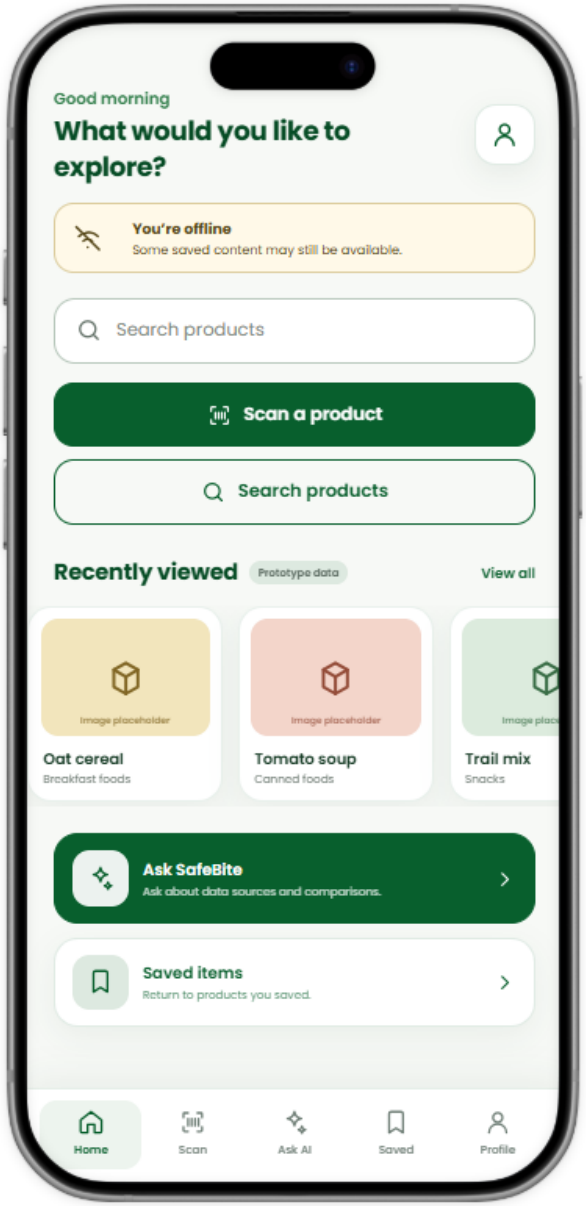

5 Home Dashboard

Purpose: Main navigation and shortcuts

5.1 Offline State

Purpose: Home screen when the user is offline

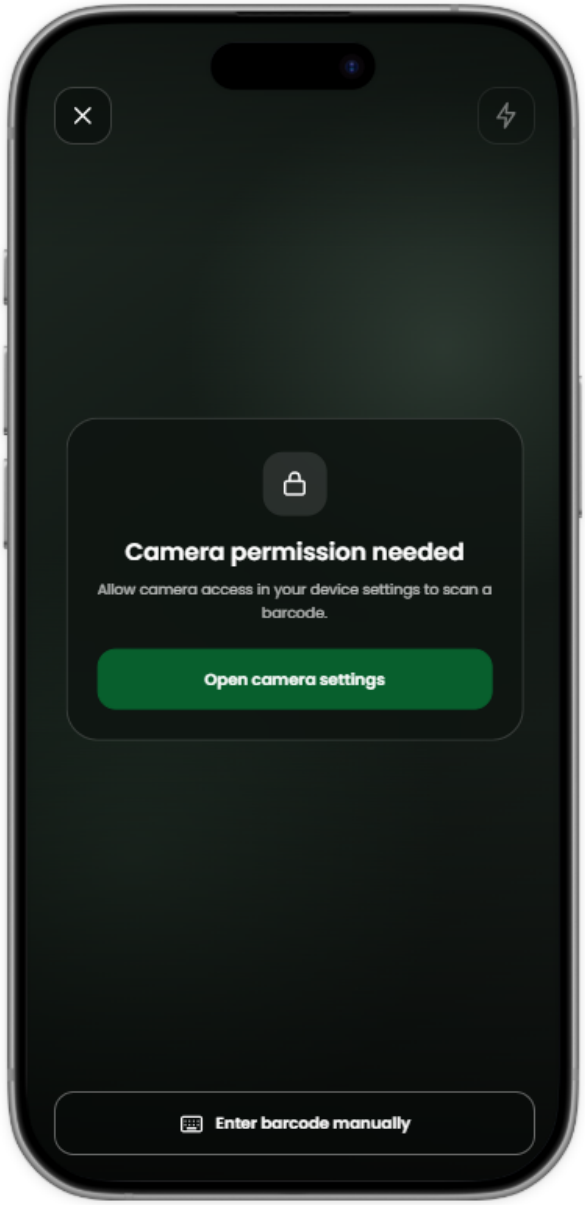

6 Barcode Scanner

Purpose: Scan a product

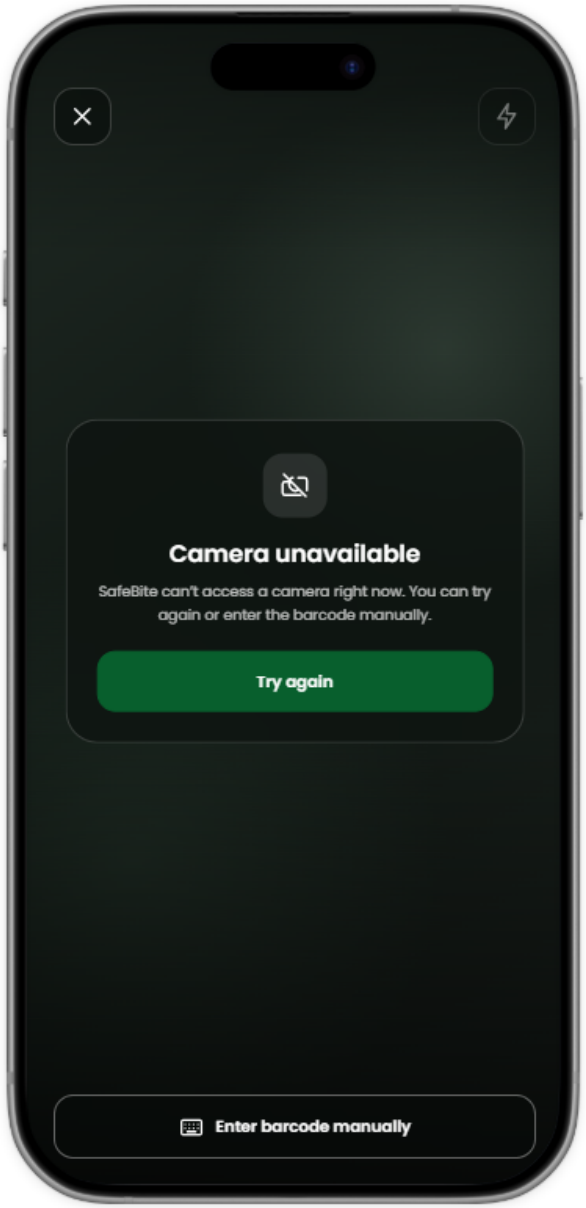

6.1 Camera Permission

Purpose: Request camera access before scanning a product

6.2 Camera Unavailable

Purpose: Explain when the camera cannot be accessed for barcode scanning

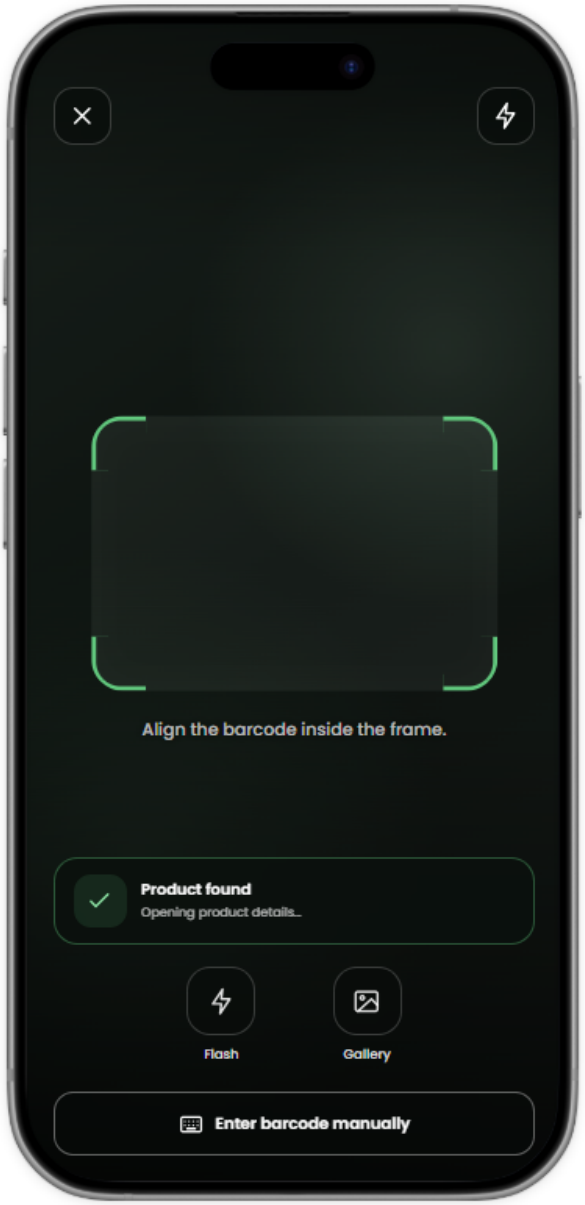

6.3 Loading Barcode Search

Purpose: Show progress while a scanned barcode is being searched

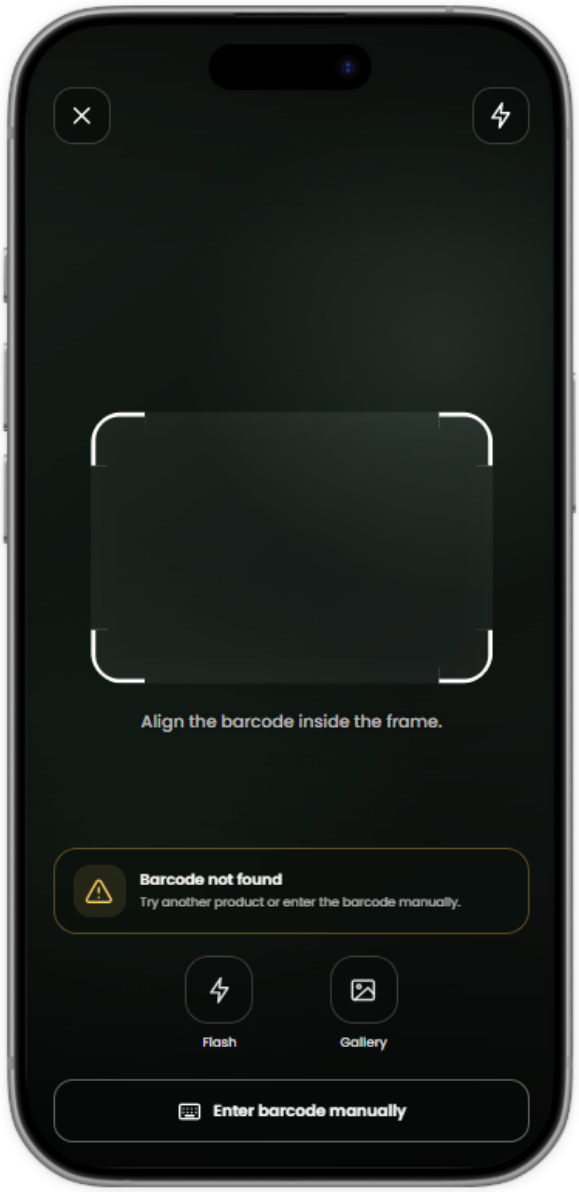

6.4 Product Found

Purpose: Confirm a recognized barcode and open its product details

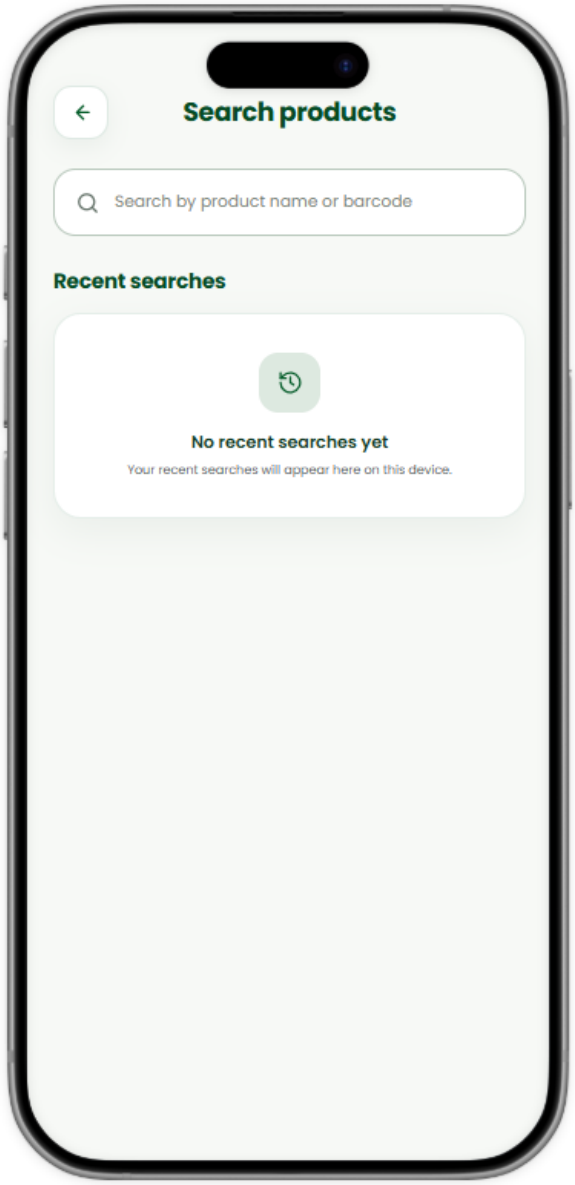

6.5 Unknown Barcode

Purpose: Explain when a scanned barcode is not recognized

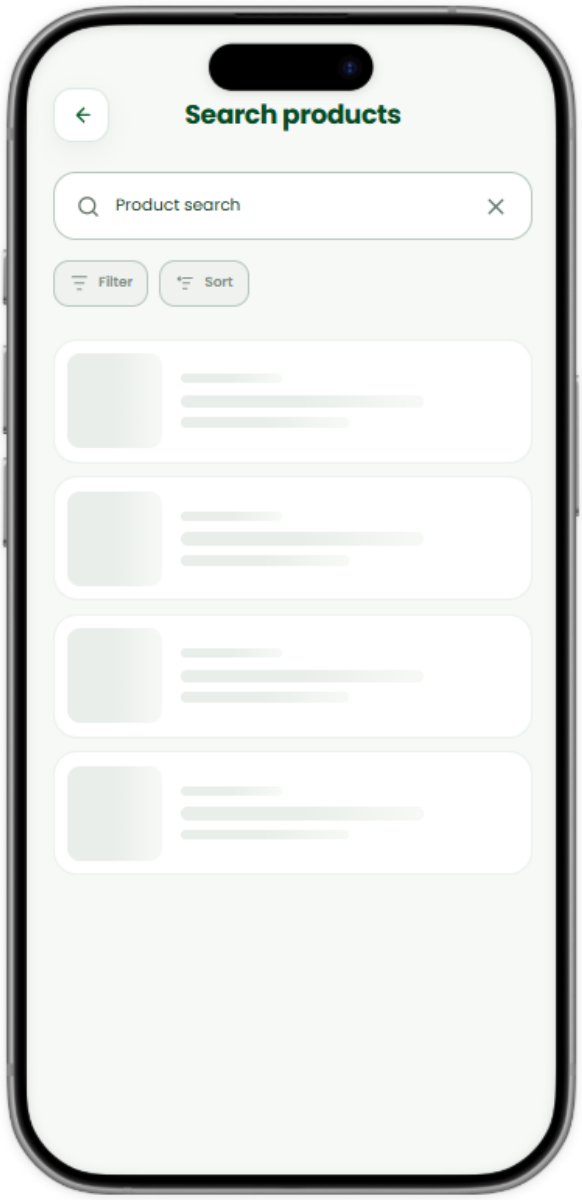

7 Search Products

Purpose: Find products

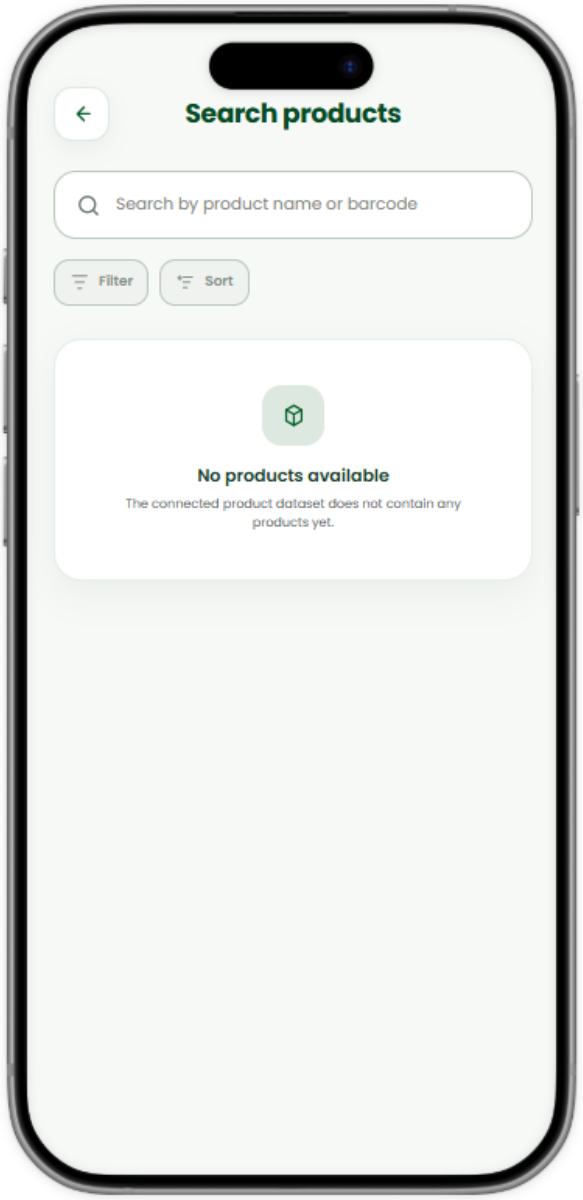

7.1 Loading Search Results

Purpose: Show placeholder results while product search is loading

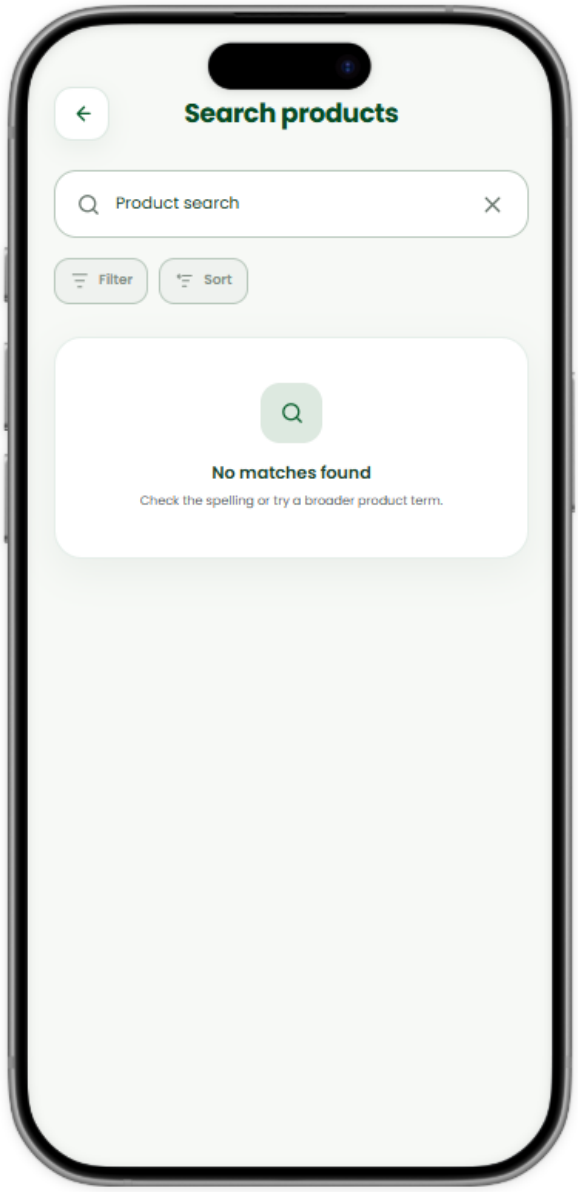

7.2 Empty Dataset

Purpose: Explain when no products are available in the connected dataset

7.3 No Matches

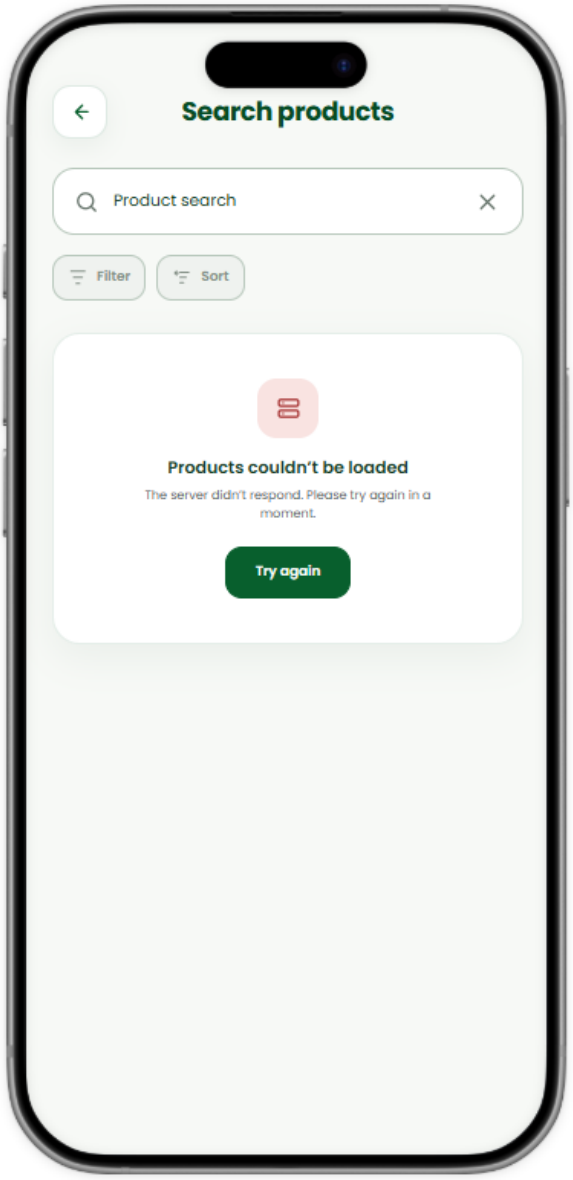

Purpose: Show when the current search or filters return no matching products

7.4 Server Error

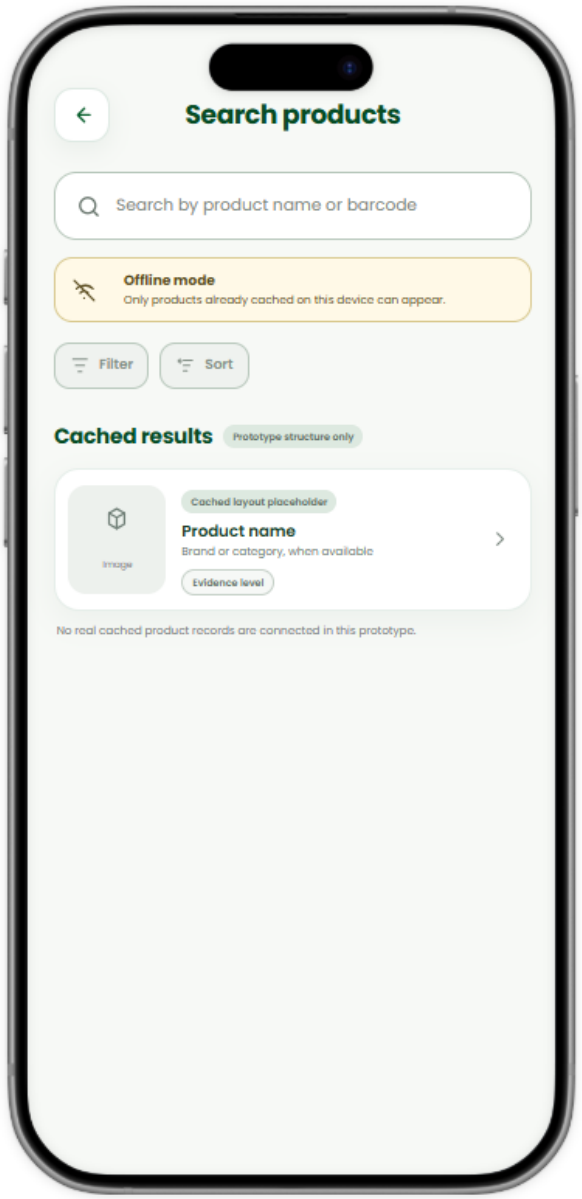

Purpose: Explain when the server cannot complete a product search

---

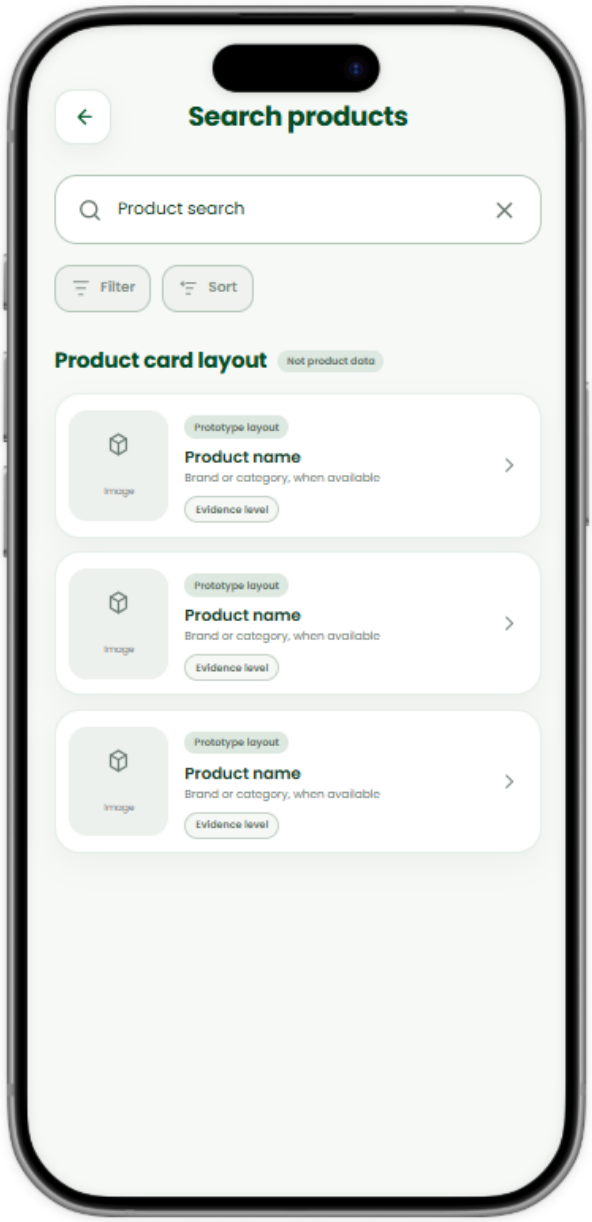

7.5 Offline Cached Results

Purpose: Show previously cached product results while offline

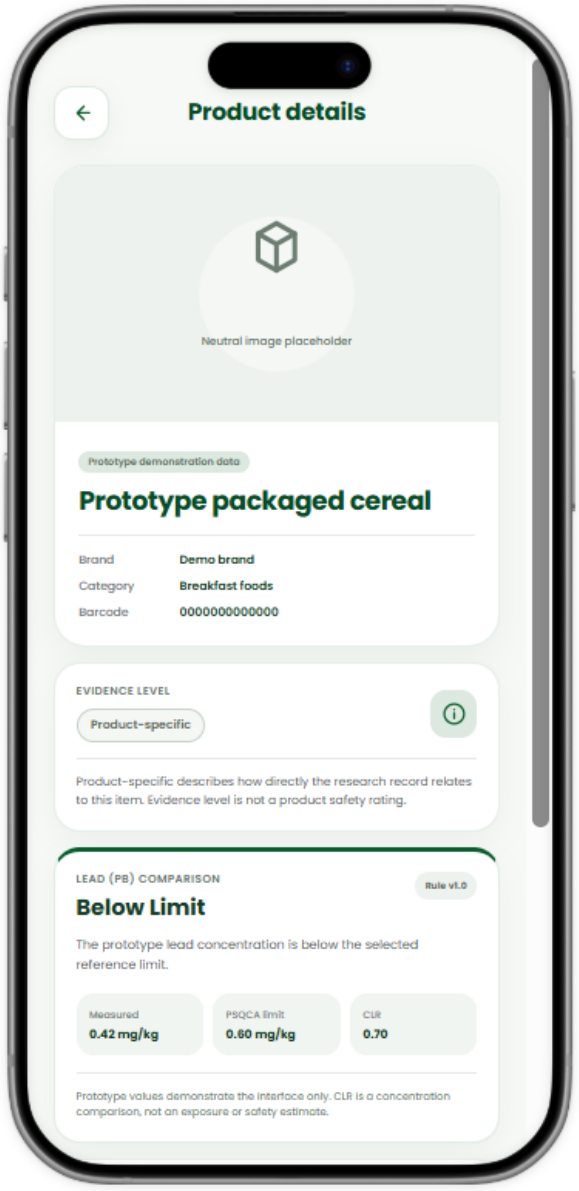

7.6 Product Card Layout Preview

Purpose: Preview the product-card layout used in Search Products

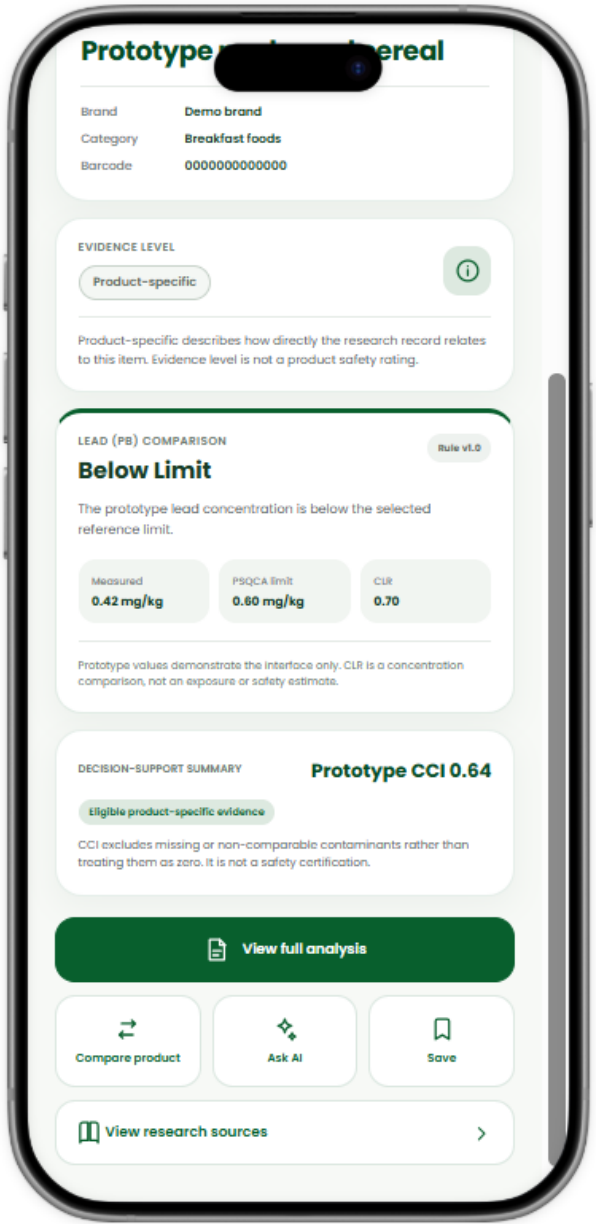

8 Product Details

Purpose: Product identity and available analysis

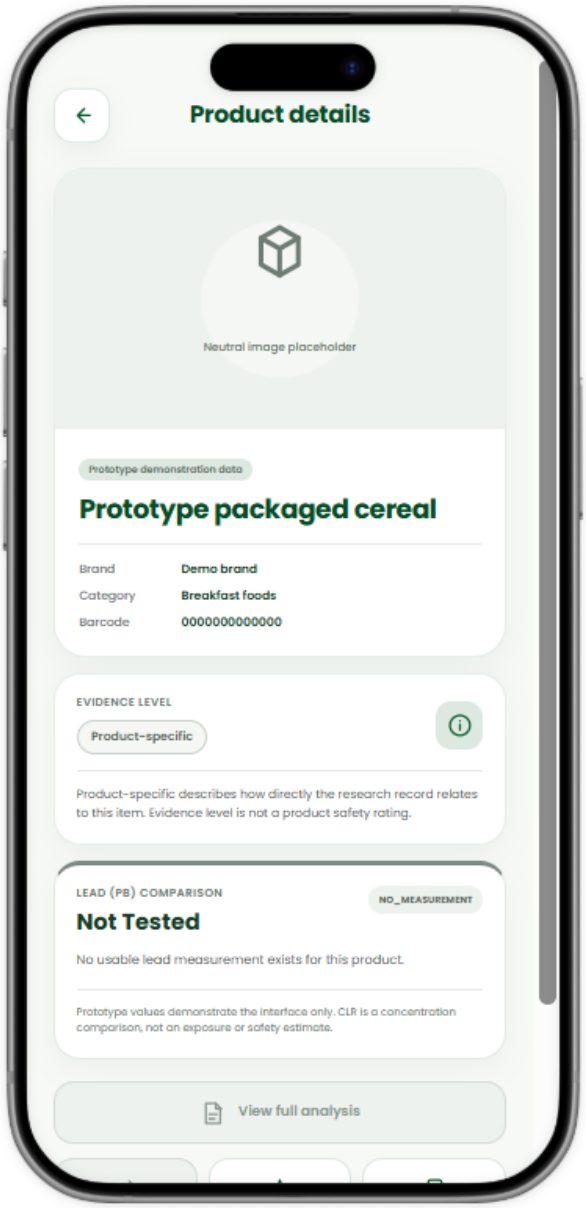

8.1 Scrollable Product Details (Continued)

Purpose: Continuation of the Product Details screen below the initial viewport

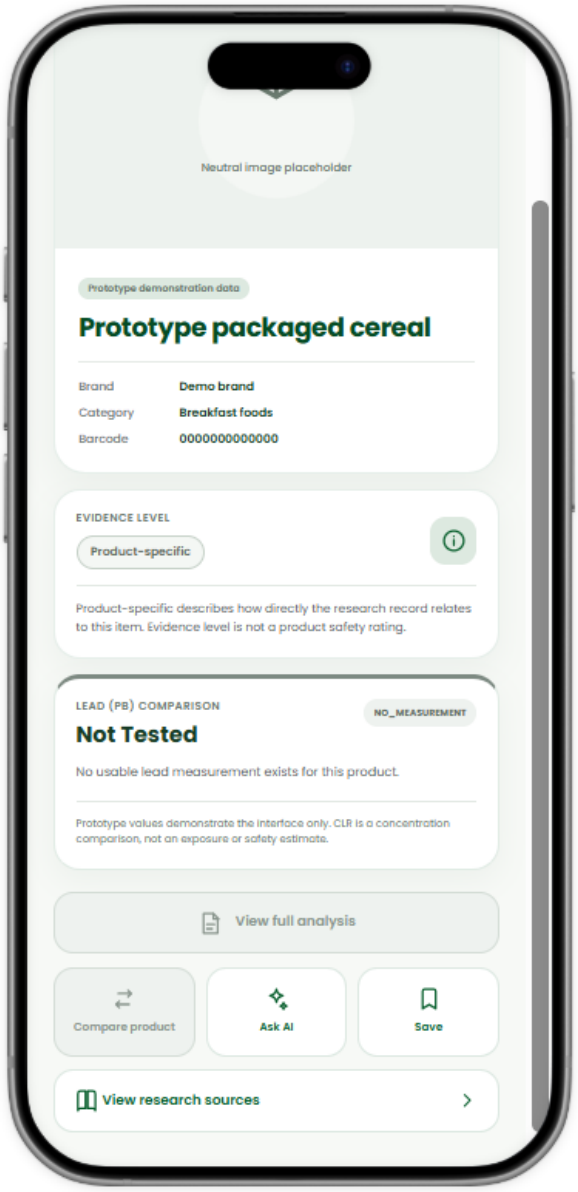

8.2 Not Tested

Purpose: Show that comparison results are unavailable because the product has not been tested

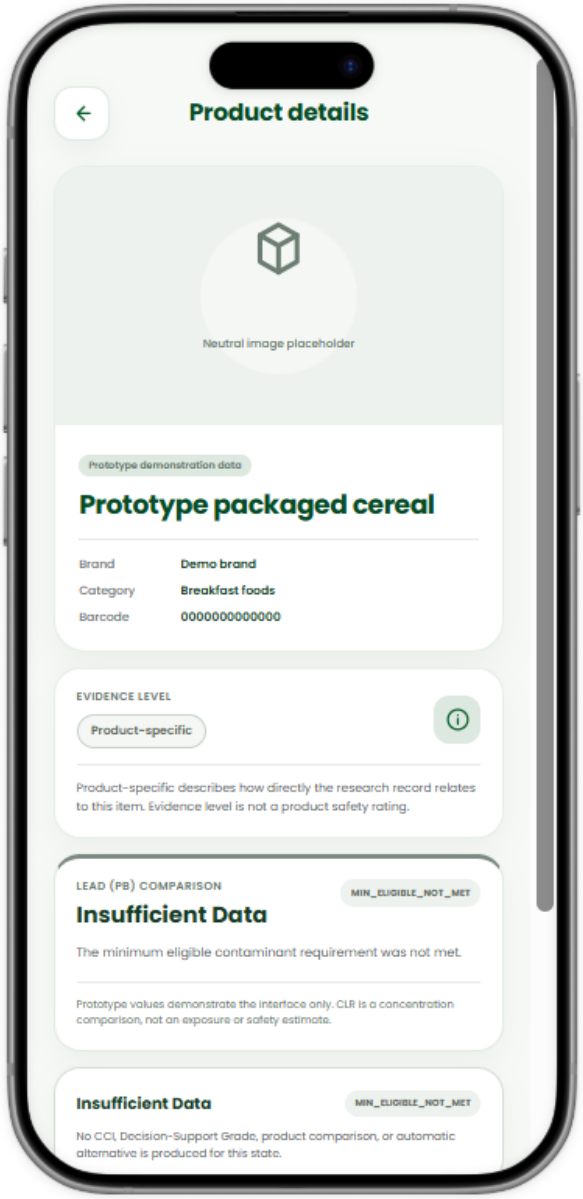

Not Tested — Continued (Scrolled View)

Purpose: Continuation of the Not Tested Product Details screen after scrolling

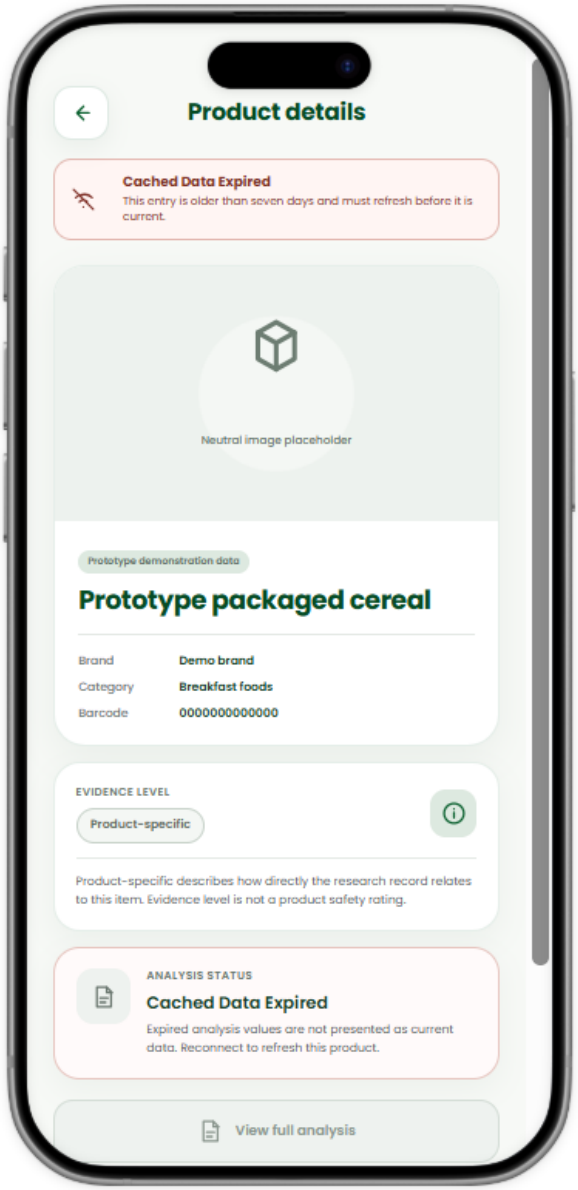

8.3 Insufficient Data

Purpose: Explain when available product data is not sufficient for a comparison

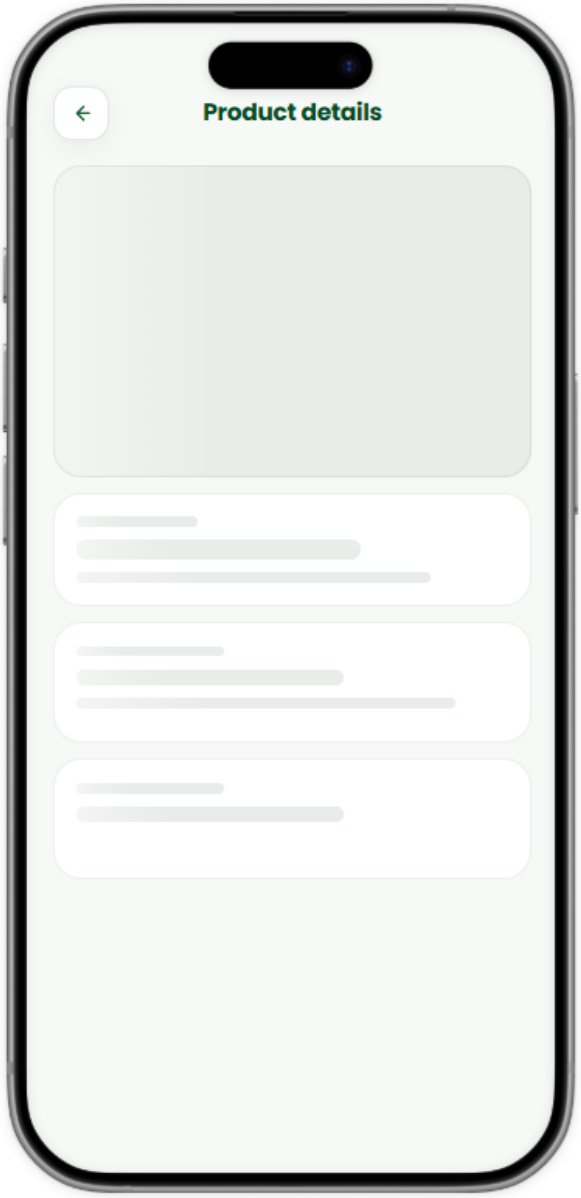

8.4 Cache Data Expired

Purpose: Explain when cached product data has expired and needs refreshing

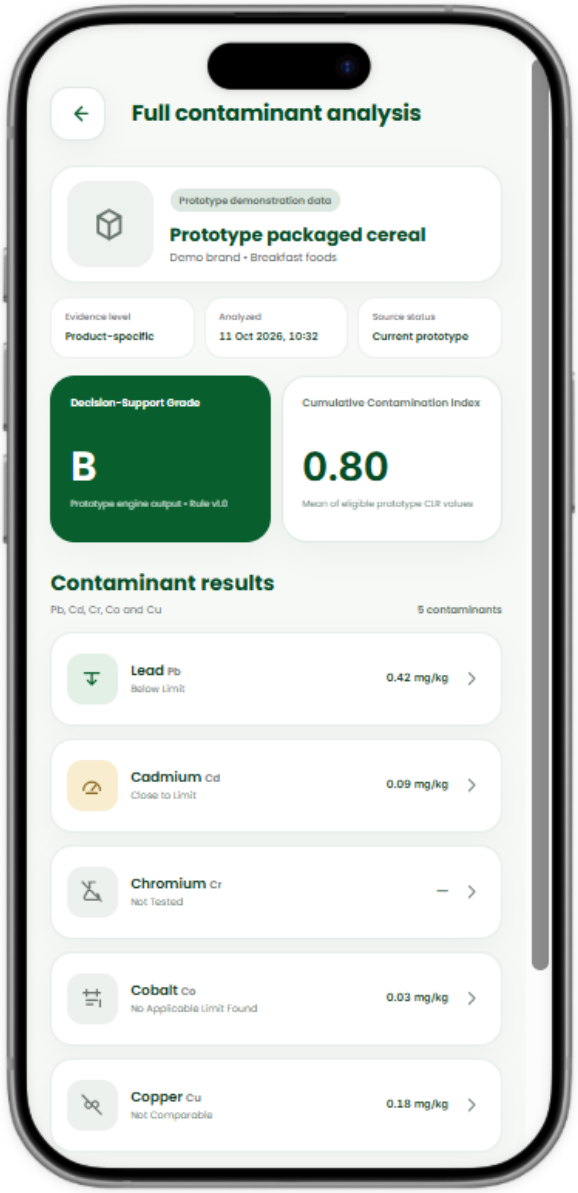

8.5 Product Details Loading

Purpose: Show the loading state while product details are retrieved

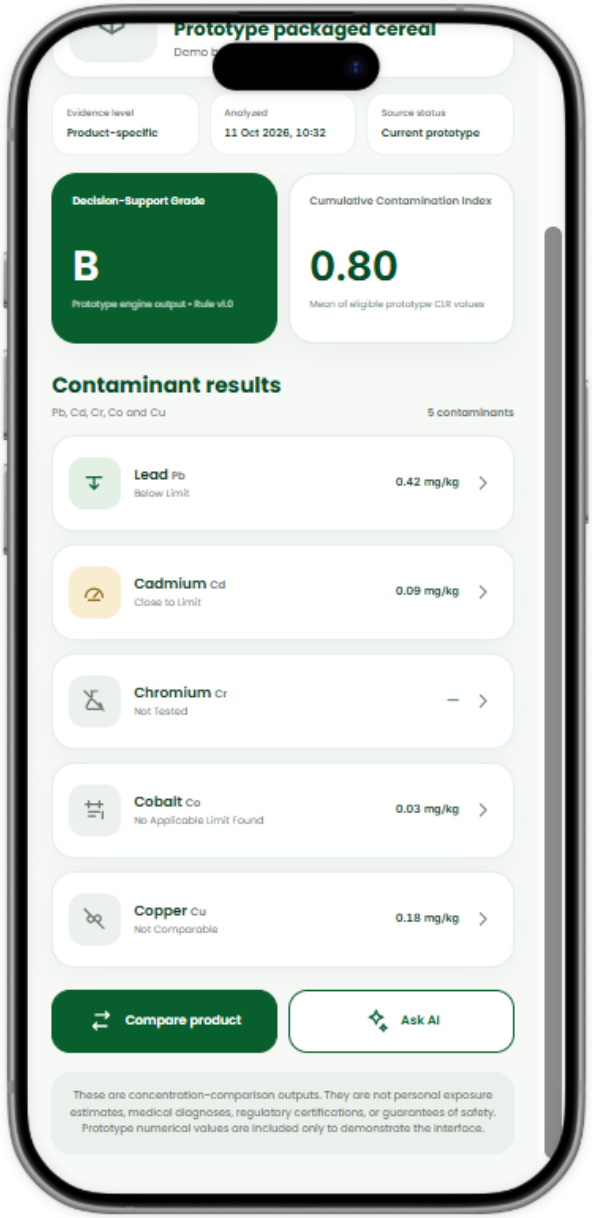

9 Full Contaminant Analysis

Purpose: Measurements and comparisons

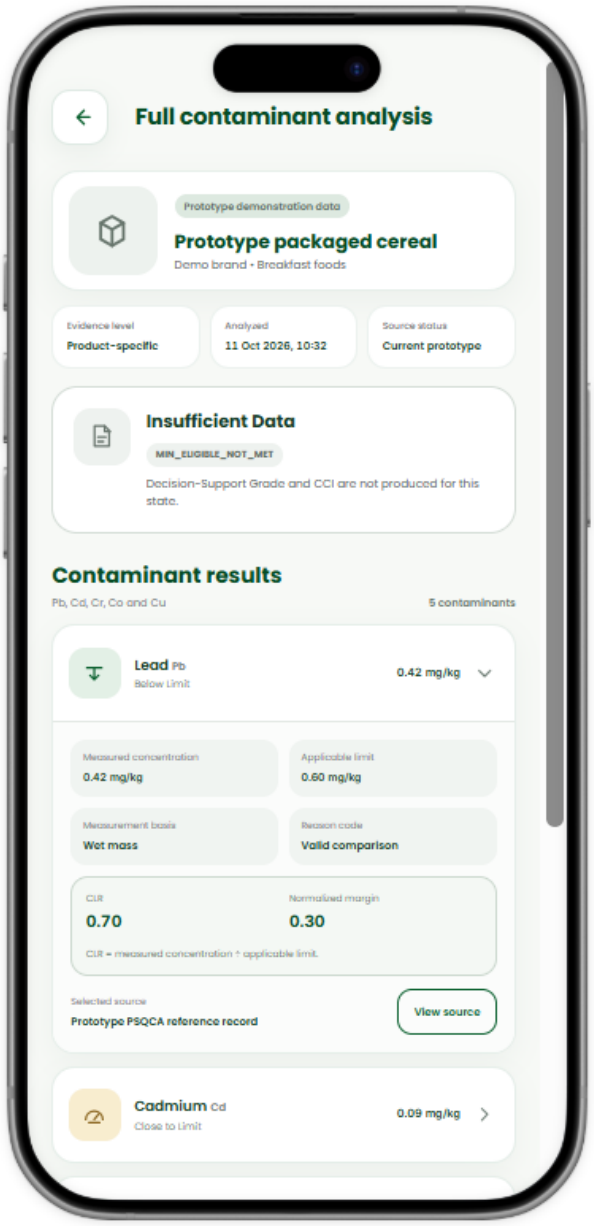

Full Contaminant Analysis — Continued (Scrolled View)

Purpose: Continuation of the contaminant analysis content below the initial viewport

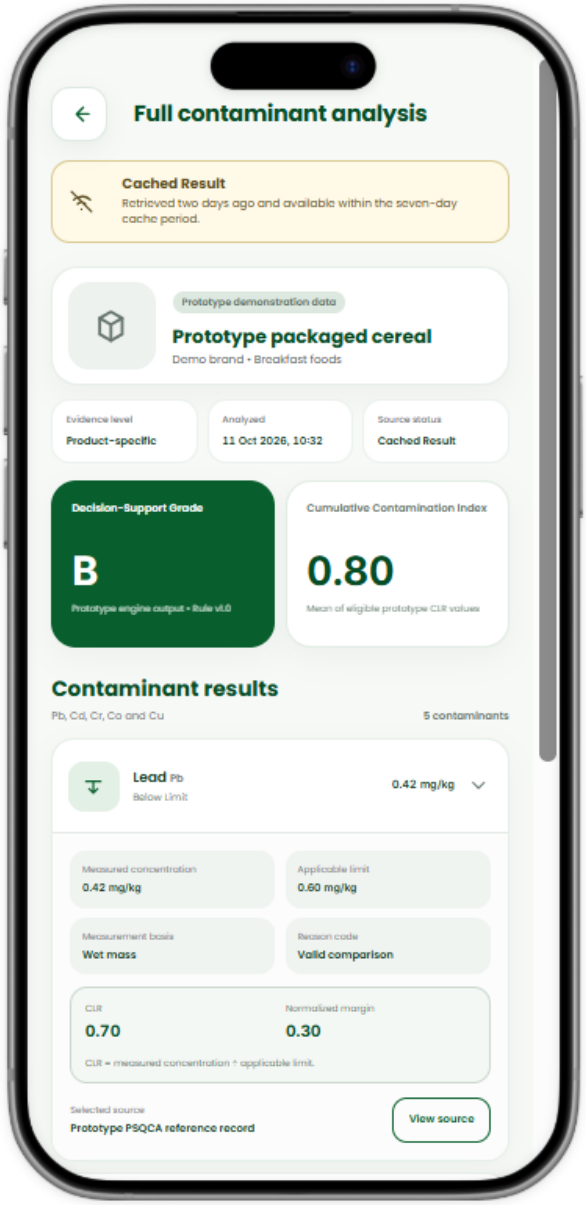

9.1 Insufficient Data — Product Contamination Details

Purpose: Explain when contamination details are unavailable because the data is insufficient

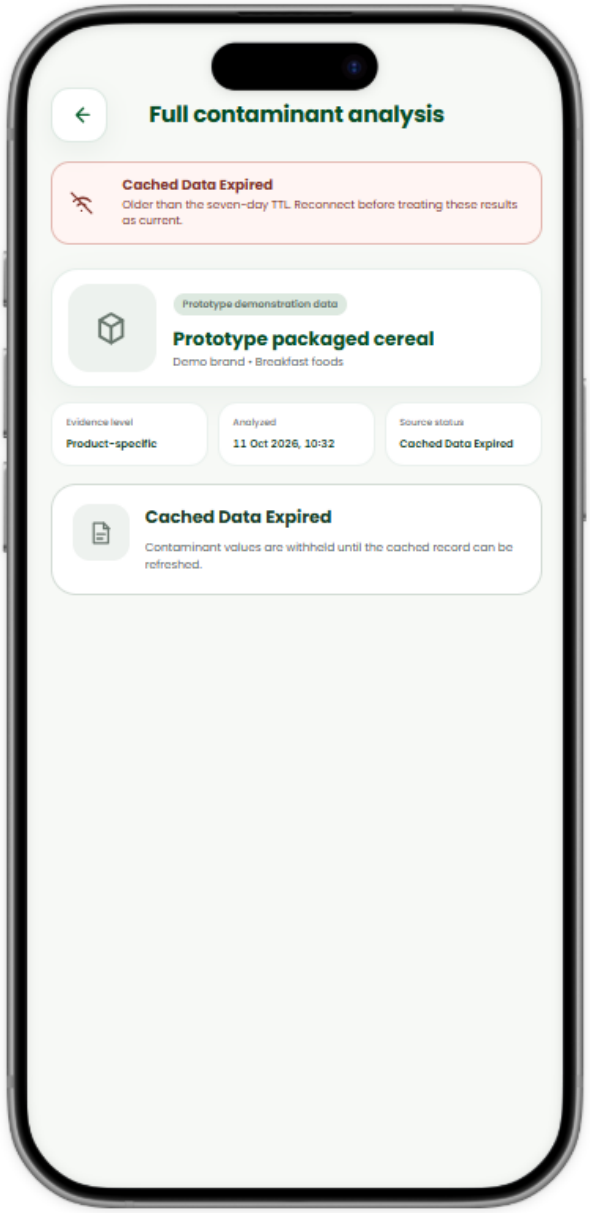

9.2 Cached Result

Purpose: Show previously cached contaminant analysis results

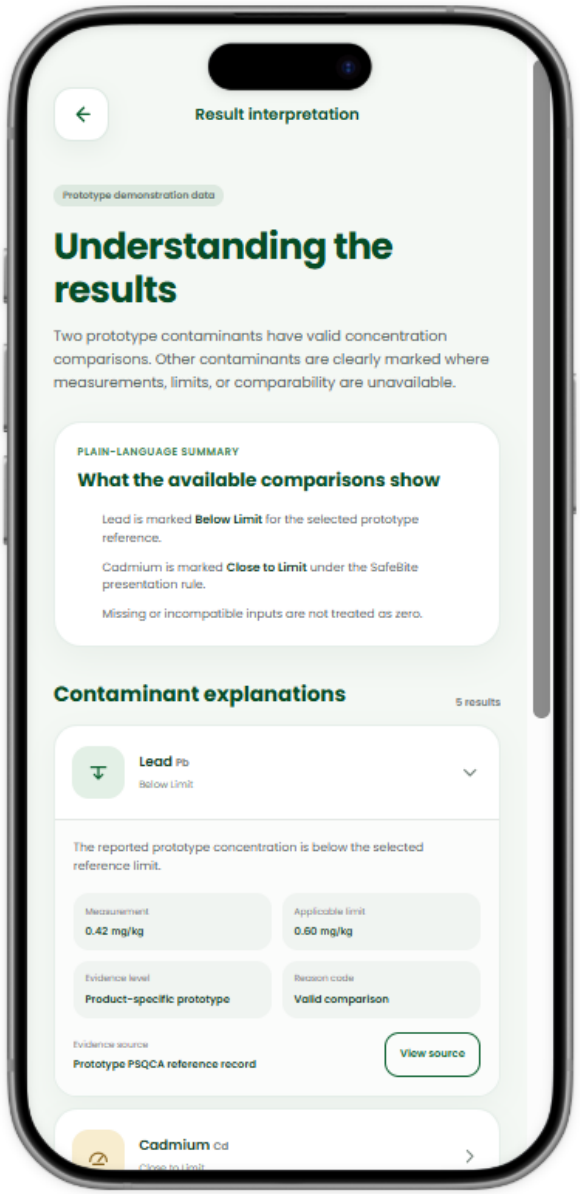

9.3 Cache Data Expired

Purpose: Explain when cached contaminant analysis data has expired and needs refreshing

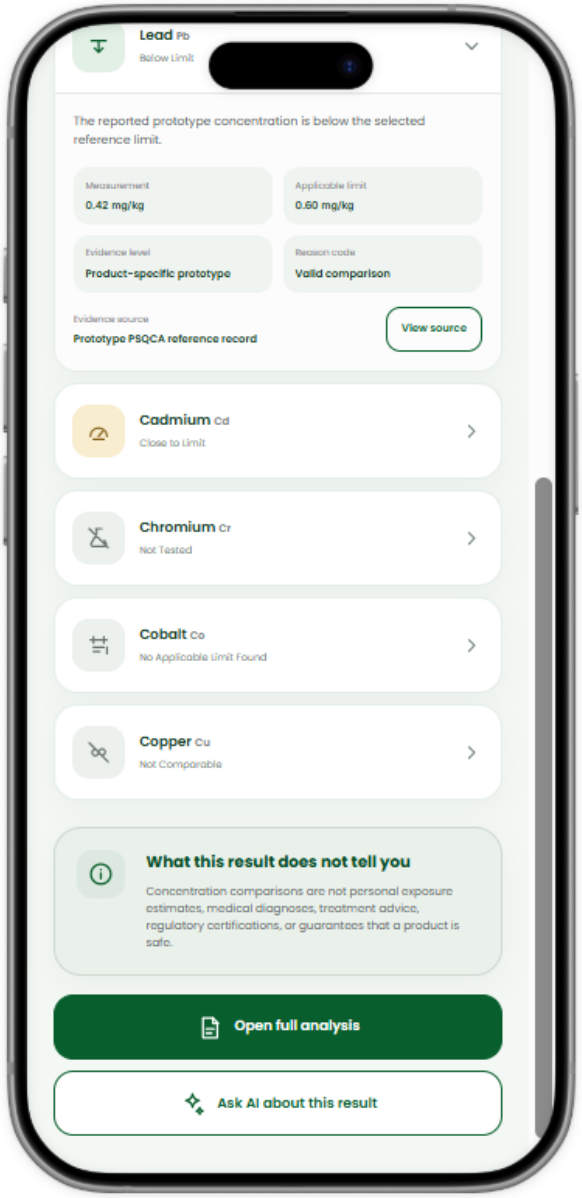

10 Heavy-Metal Interpretation

Purpose: Explain technical results

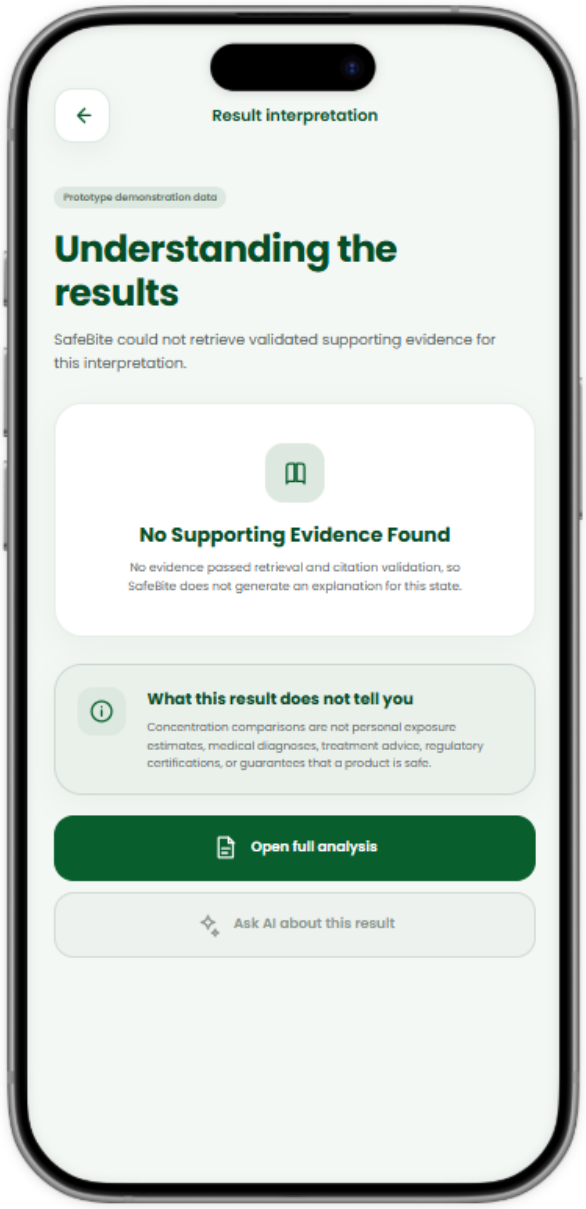

Heavy-Metal Interpretation — Continued (Scrolled View)

Purpose: Continuation of the heavy-metal interpretation content below the initial viewport

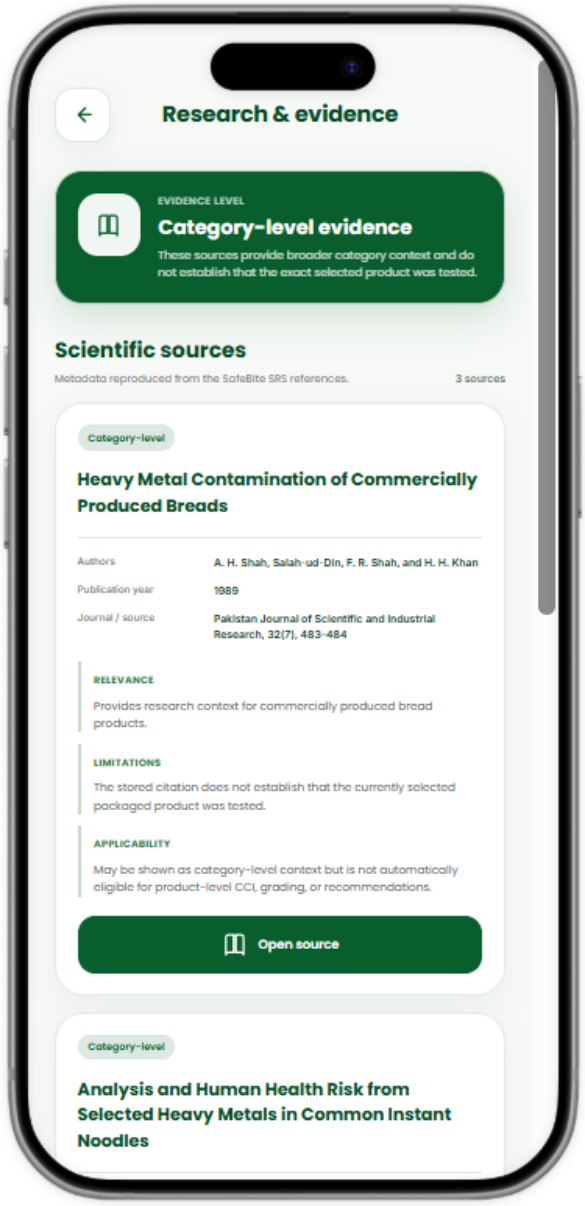

10.1 No Supporting Evidence Found

Purpose: Explain when no supporting evidence is available for the interpretation

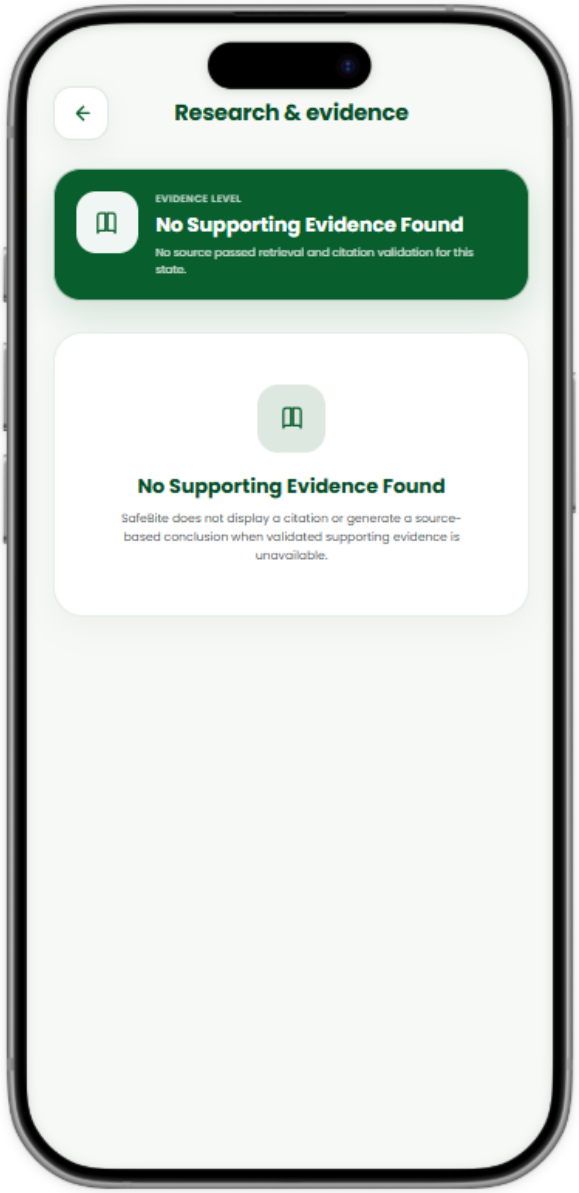

11 Research & Evidence

Purpose: Sources, studies and reference limits

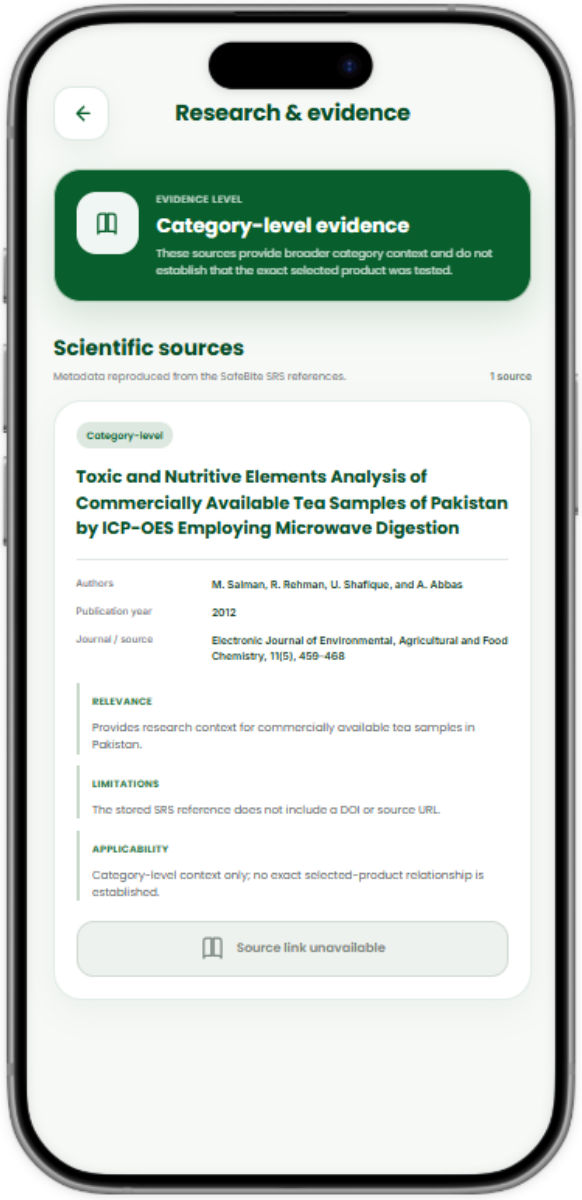

11.1 No Supporting Evidence Found

Purpose: Explain when no validated supporting evidence is available

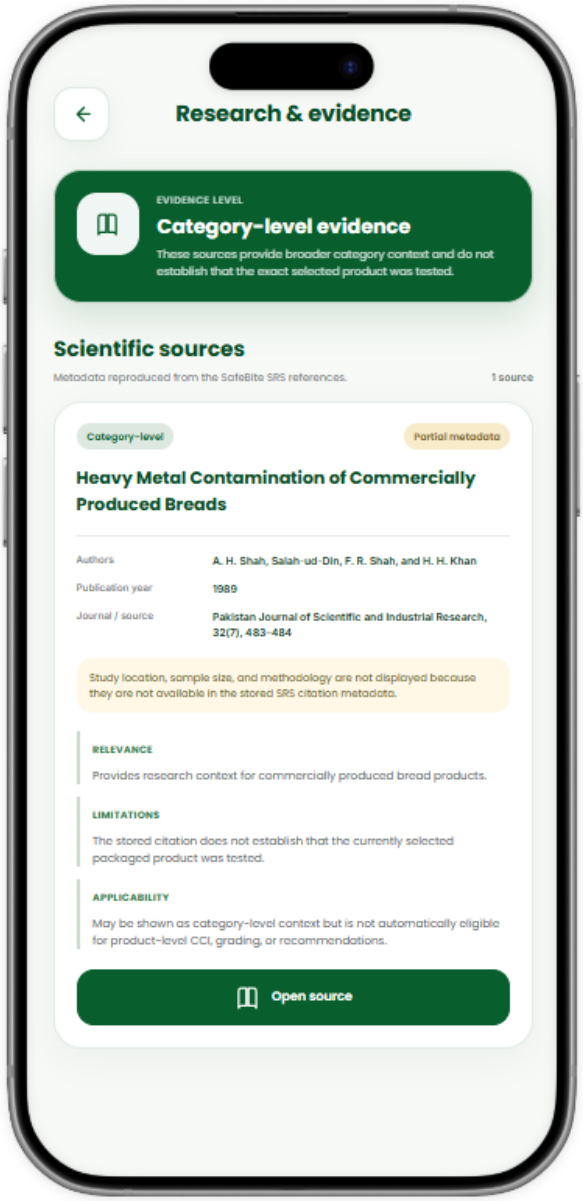

11.2 Unavailable Source Link

Purpose: Show when a research source has no working or stored link

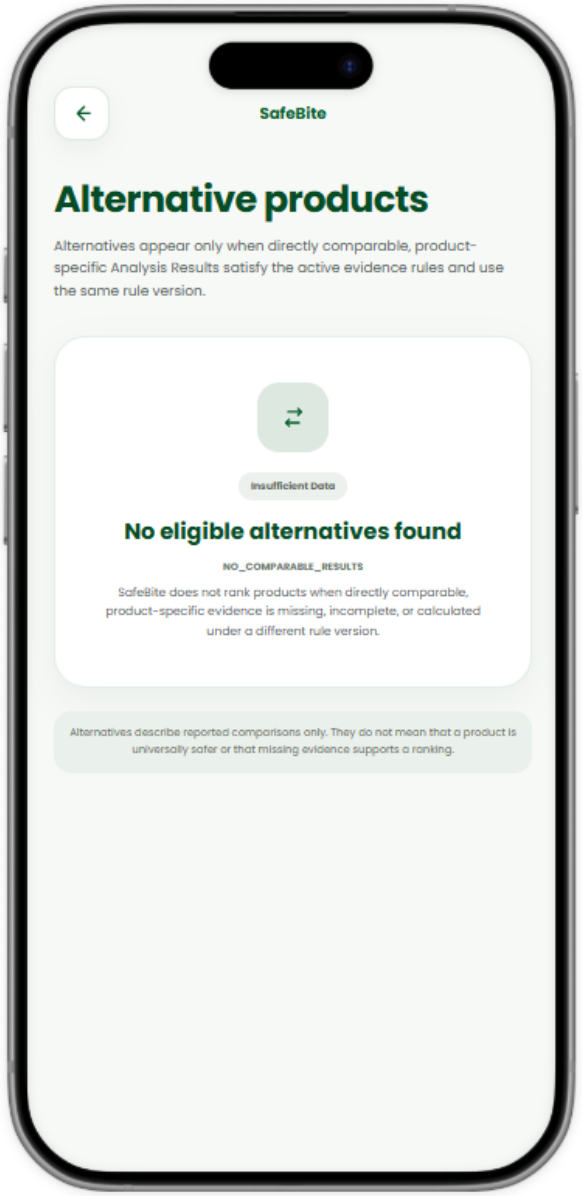

11.3 Partial Metadata

Purpose: Show research evidence when some source metadata is unavailable

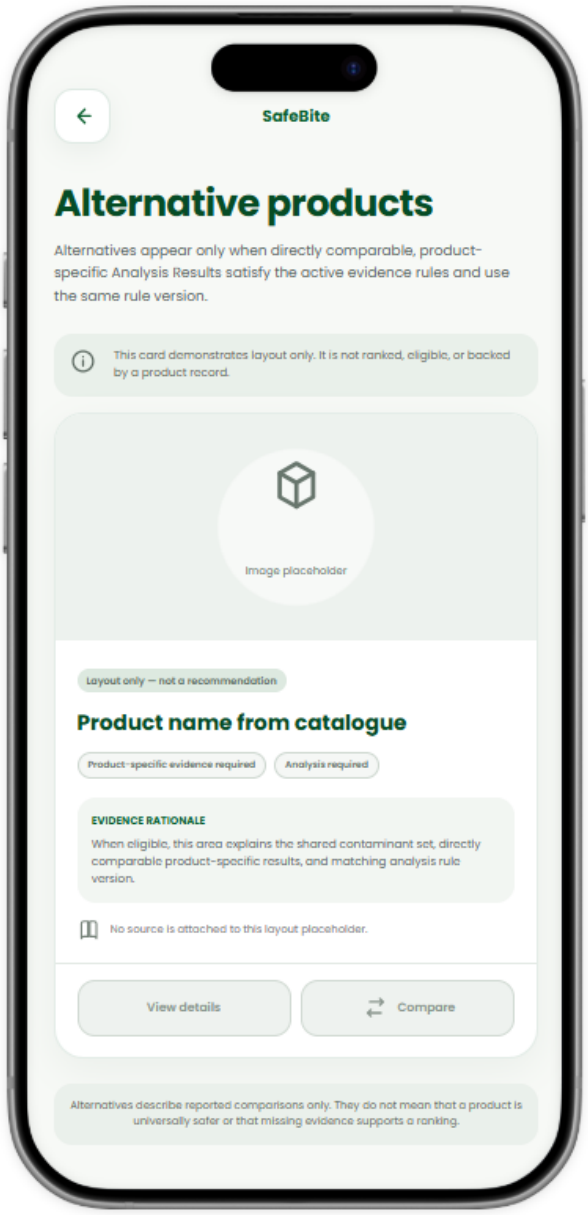

12 Evidence-Based Alternatives

Purpose: Eligible alternative products

12.1 Alternate Products Layout

Purpose: Preview the layout for displaying eligible alternative products

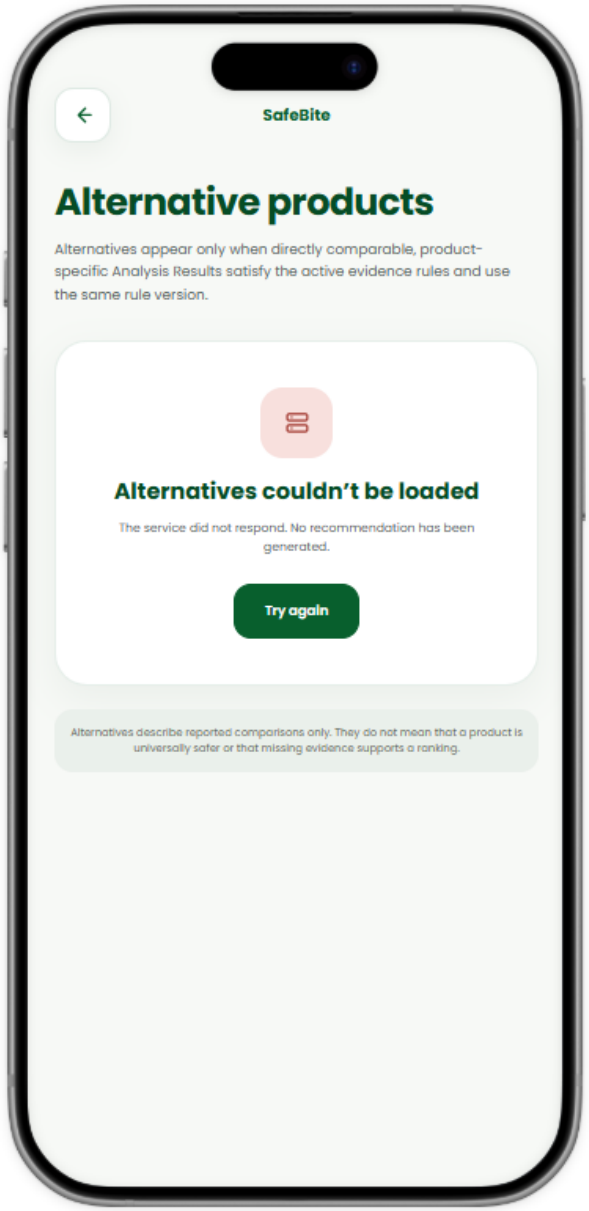

12.2 Loading Alternatives

Purpose: Show loading feedback while eligible alternatives are retrieved

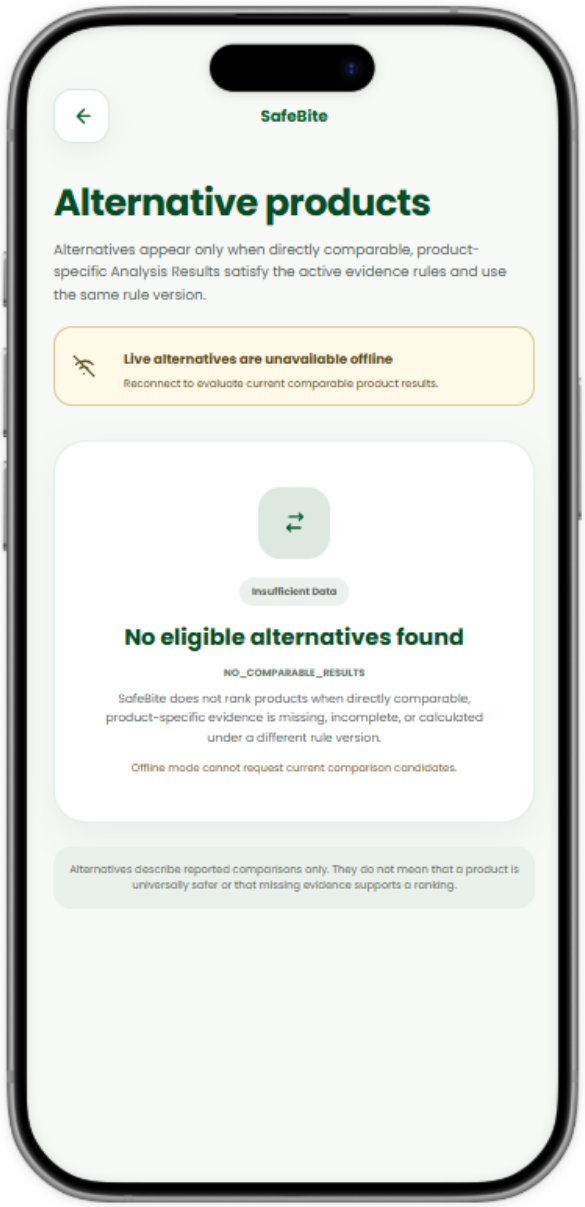

12.3 Network Error

Purpose: Explain when eligible alternatives cannot be retrieved because of a network error

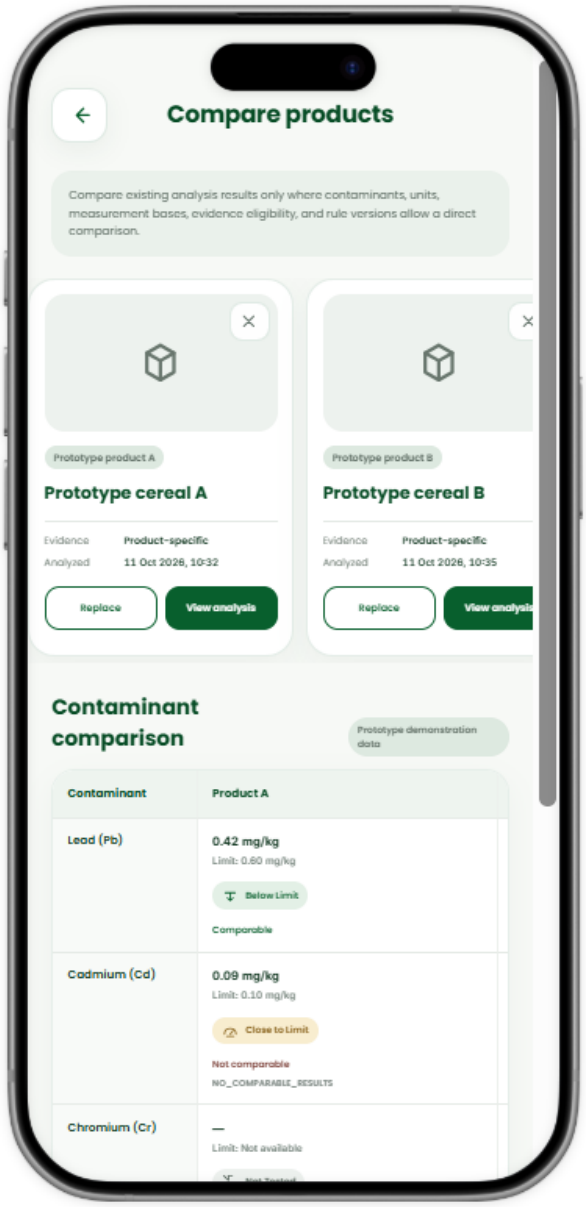

12.4 Offline Screen for Alternative Products

Purpose: Explain that alternative products cannot be retrieved while offline and current comparison candidates are unavailable

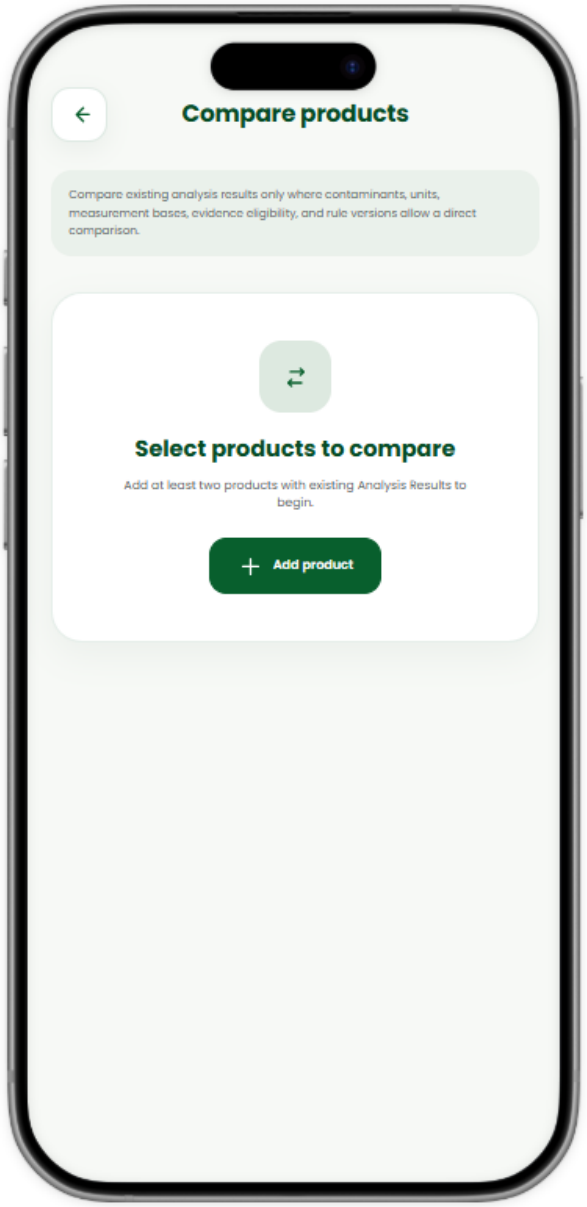

13 Product Comparison

Purpose: Compare selected products

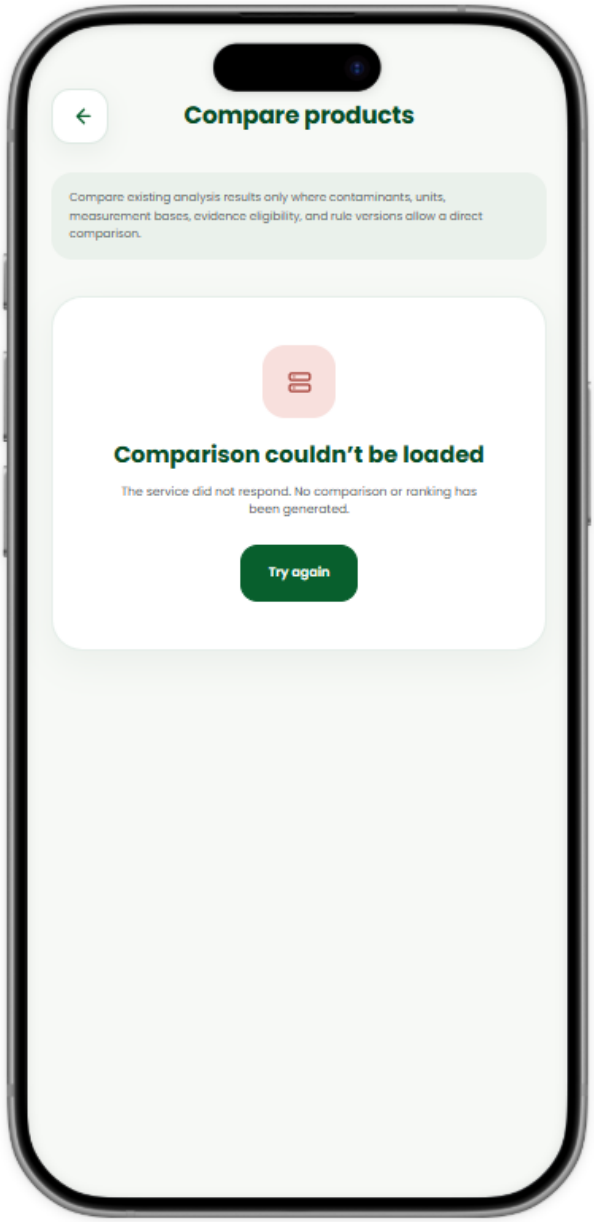

13.1 Empty Selection

Purpose: Explain that products must be selected before comparison

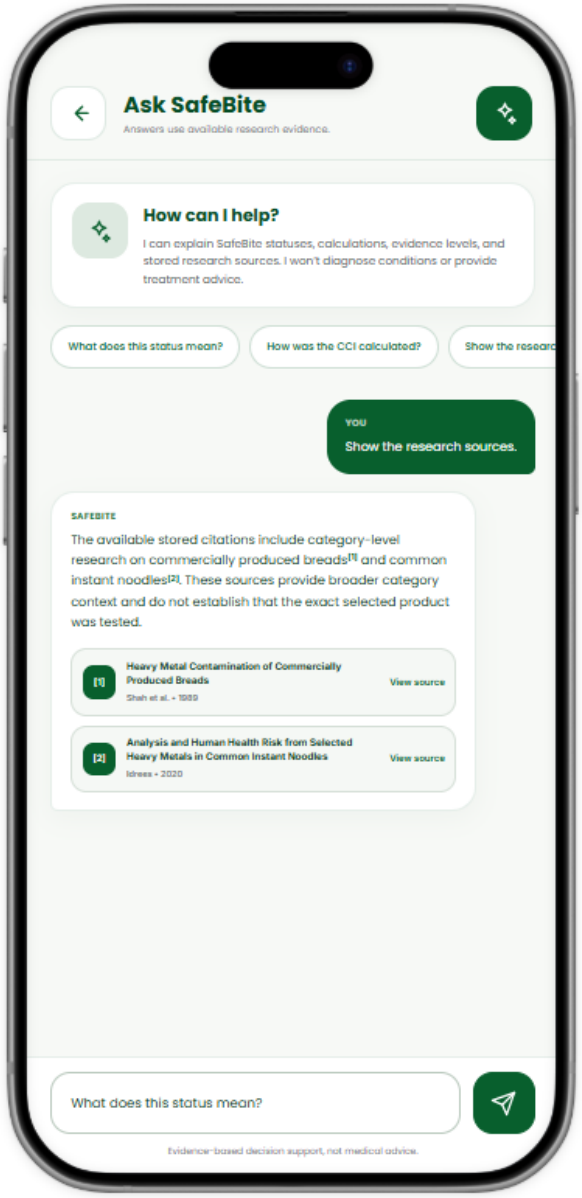

13.2 Service Error

Purpose: Explain when the comparison service cannot return results

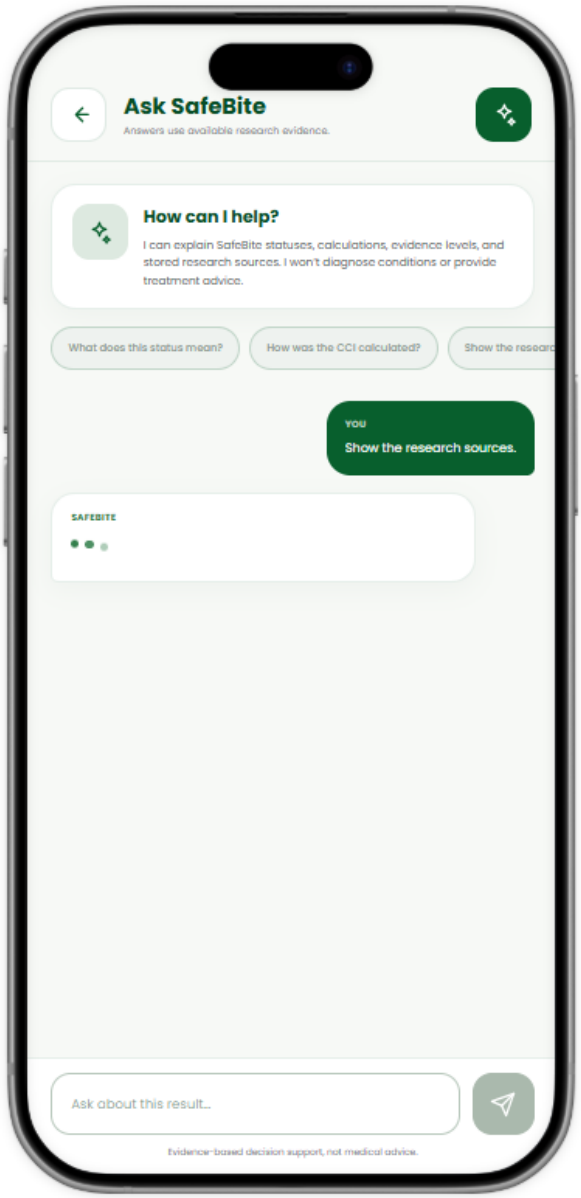

14 AI Food Safety Assistant

Purpose: Evidence-grounded questions

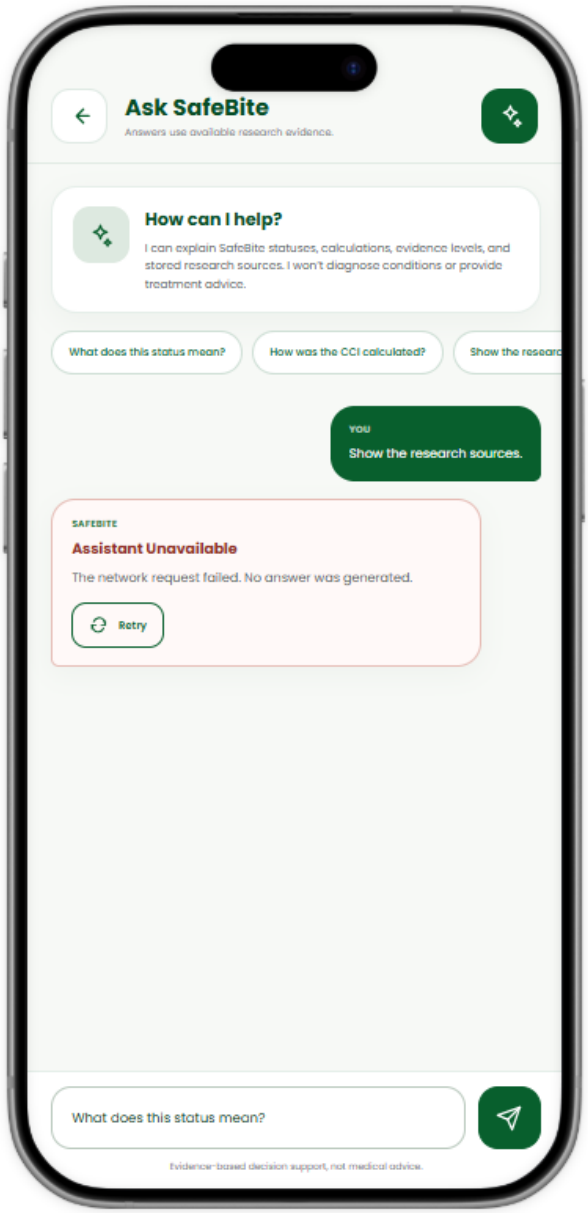

14.1 Layout of AI Generating Response

Purpose: Show the assistant response layout and progress while an evidence-grounded answer is being generated.

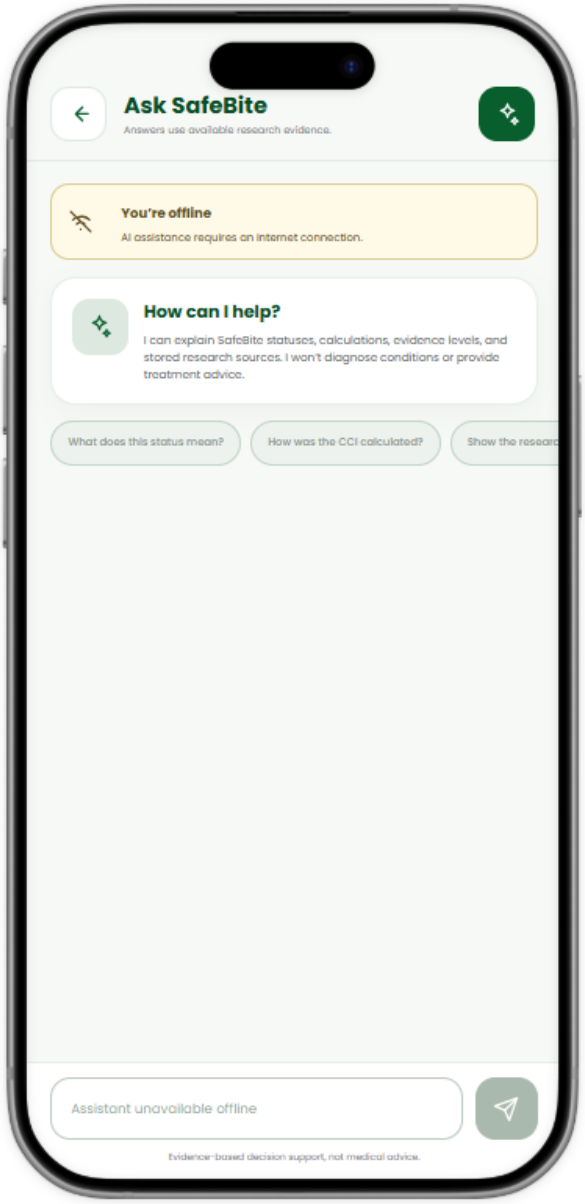

14.2 Network Failure

Purpose: Explain that the AI assistant cannot respond because of a network failure and offer a retry path.

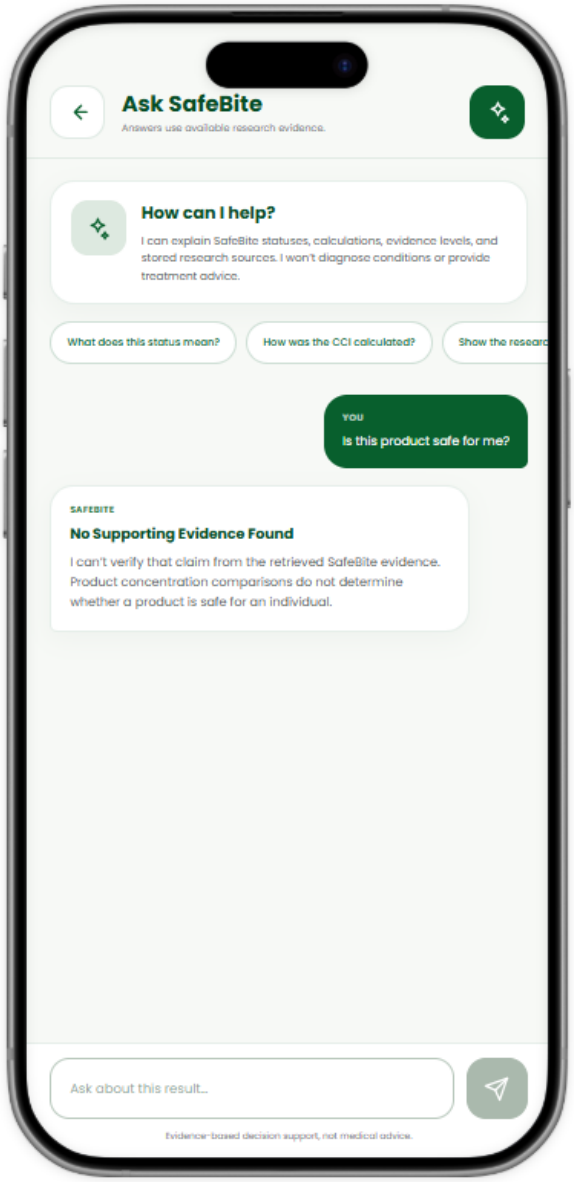

14.3 Offline State of AI Chat

Purpose: Show that AI chat responses are unavailable while offline and explain the connection requirement.

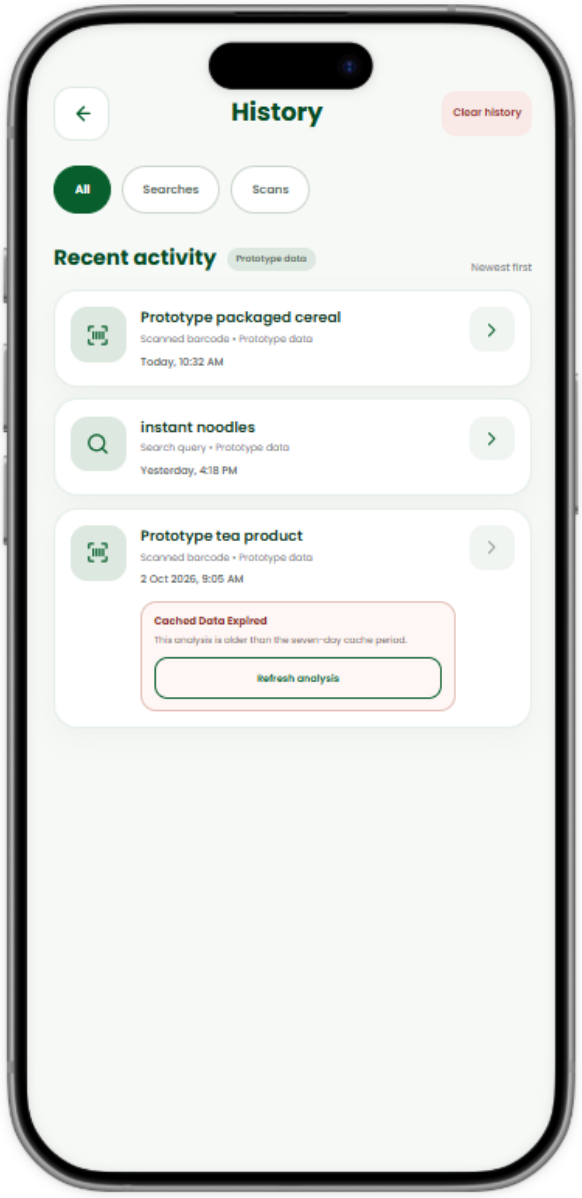

14.4 No Evidence Found

Purpose: Explain when the assistant cannot provide an answer because no supporting evidence is available.

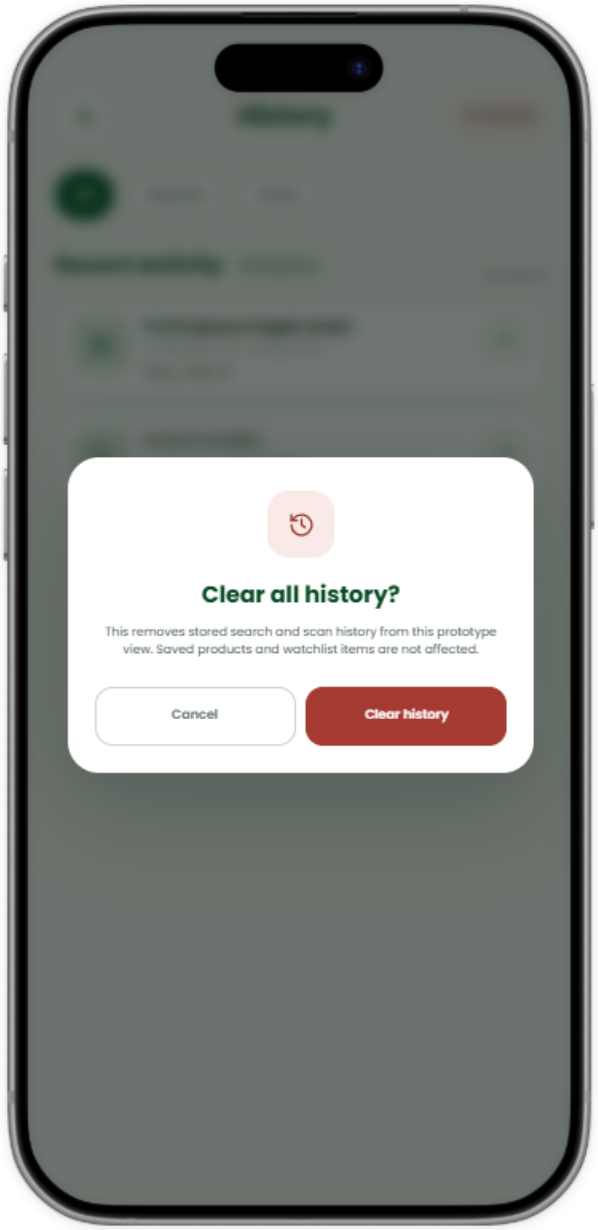

15 Search & Scan History

Purpose: Review previous activity

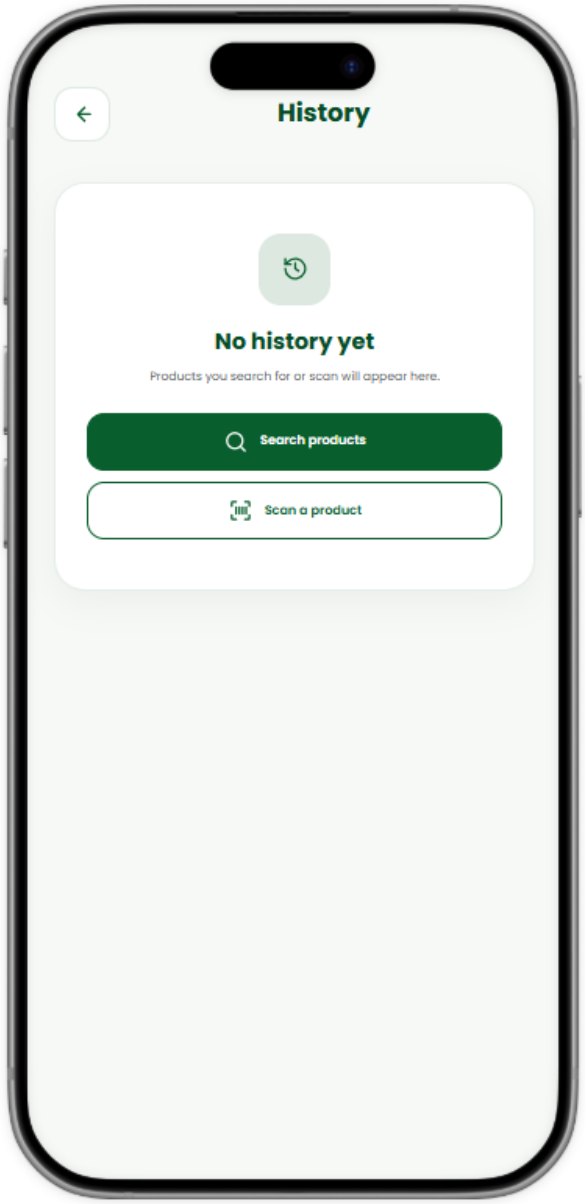

15.1 Clear History Confirmation

Purpose: Confirm that the user wants to clear search and scan history before removing it.

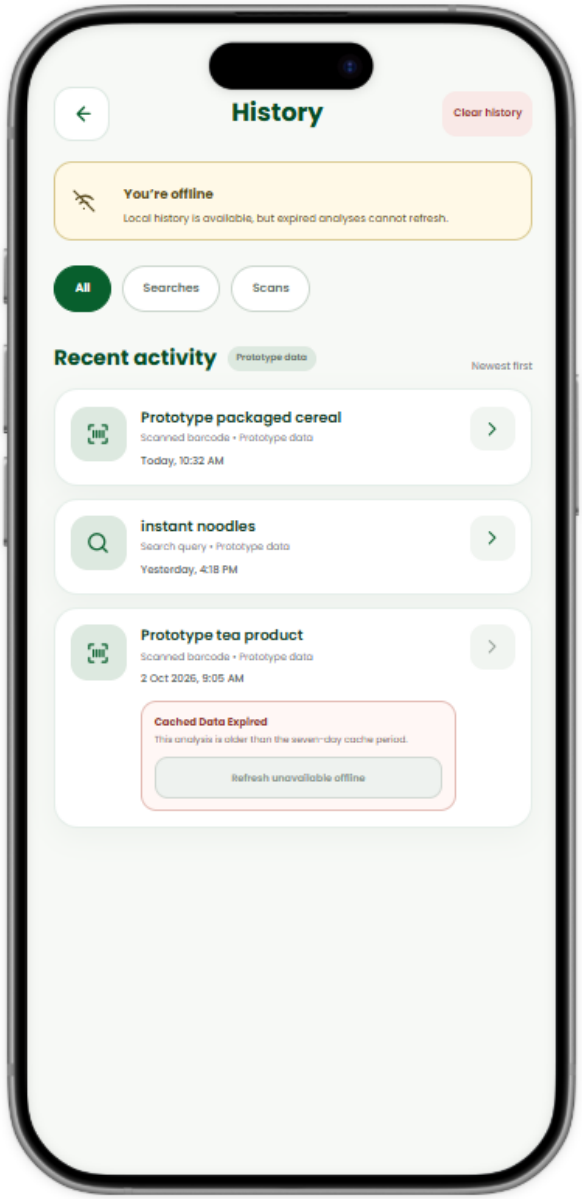

15.2 Empty History

Purpose: Explain that there is no search or scan activity to display and guide the user toward starting a new activity.

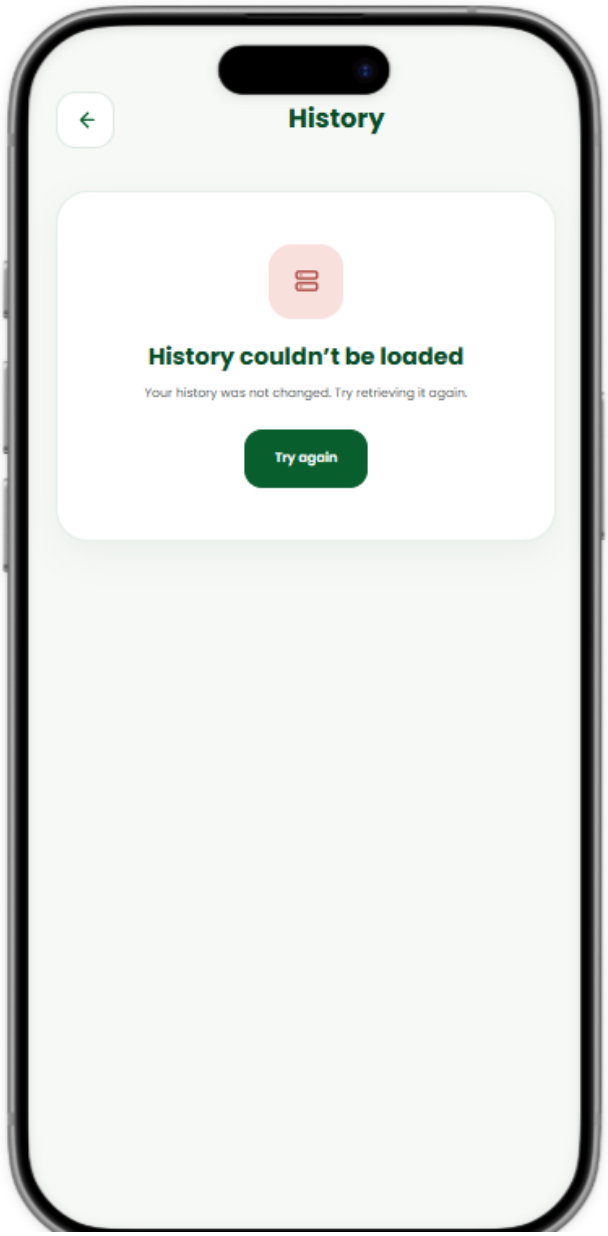

15.3 Offline

Purpose: Show locally available history while offline and indicate that expired analyses cannot be refreshed without a connection.

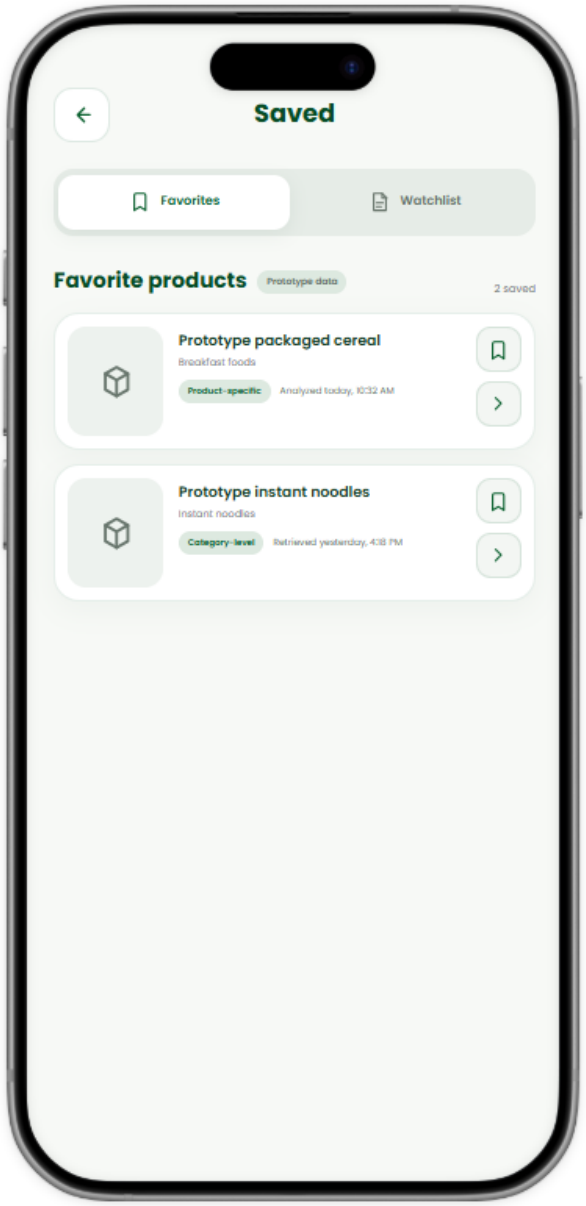

15.4 Retrieval Error

Purpose: Explain that search and scan history could not be retrieved and offer the user a way to retry.

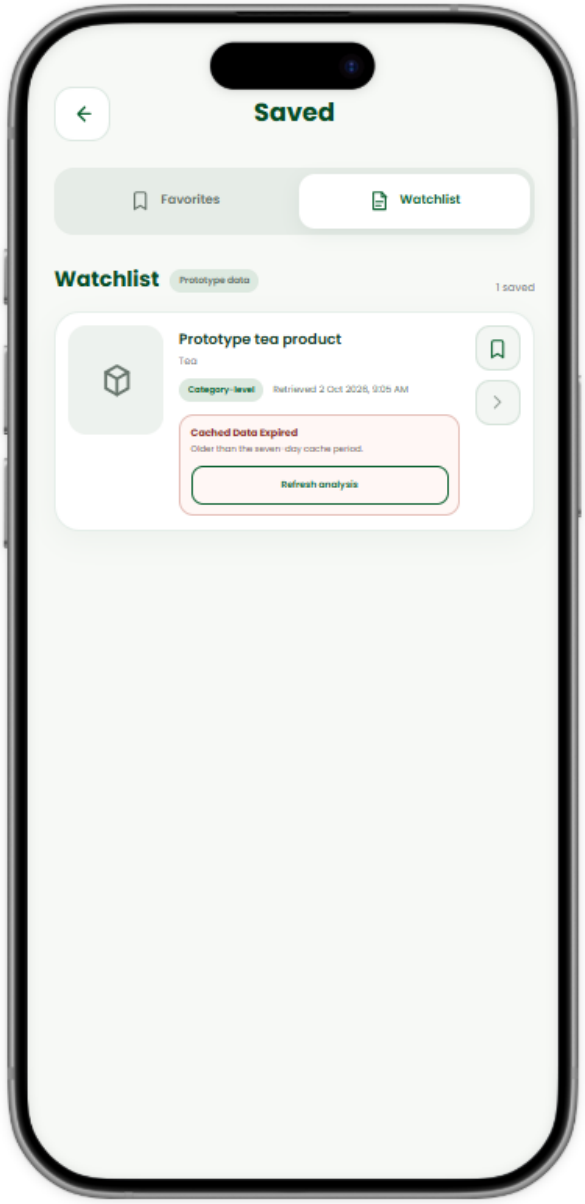

16 Favorites & Watchlist

Purpose: Saved products

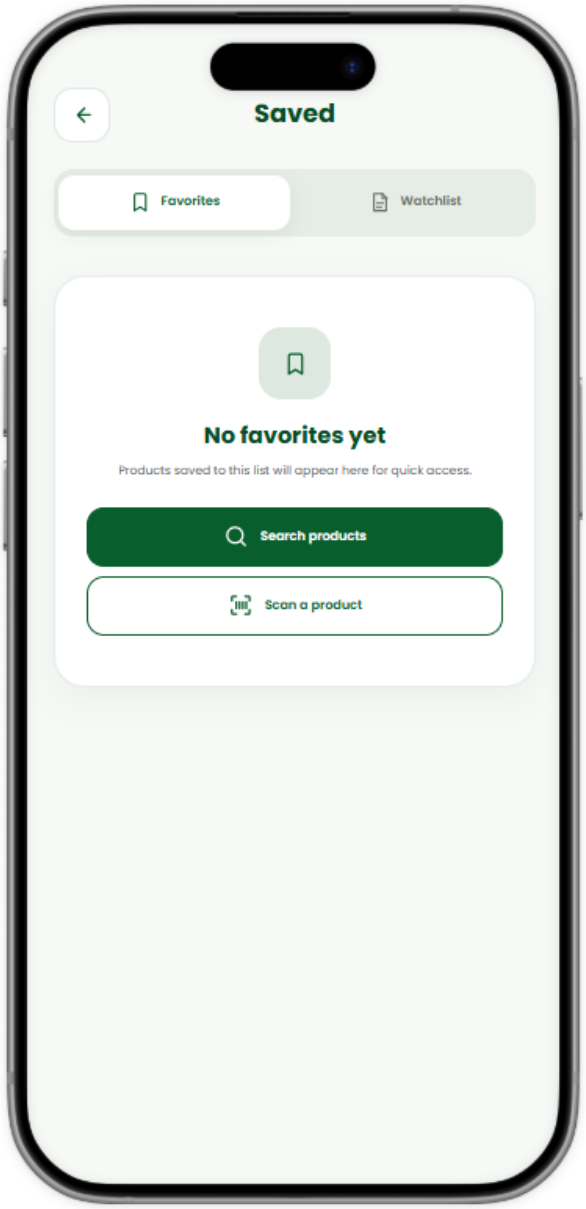

16.1 Watchlist

Purpose: Browse products saved to the watchlist and review their current status.

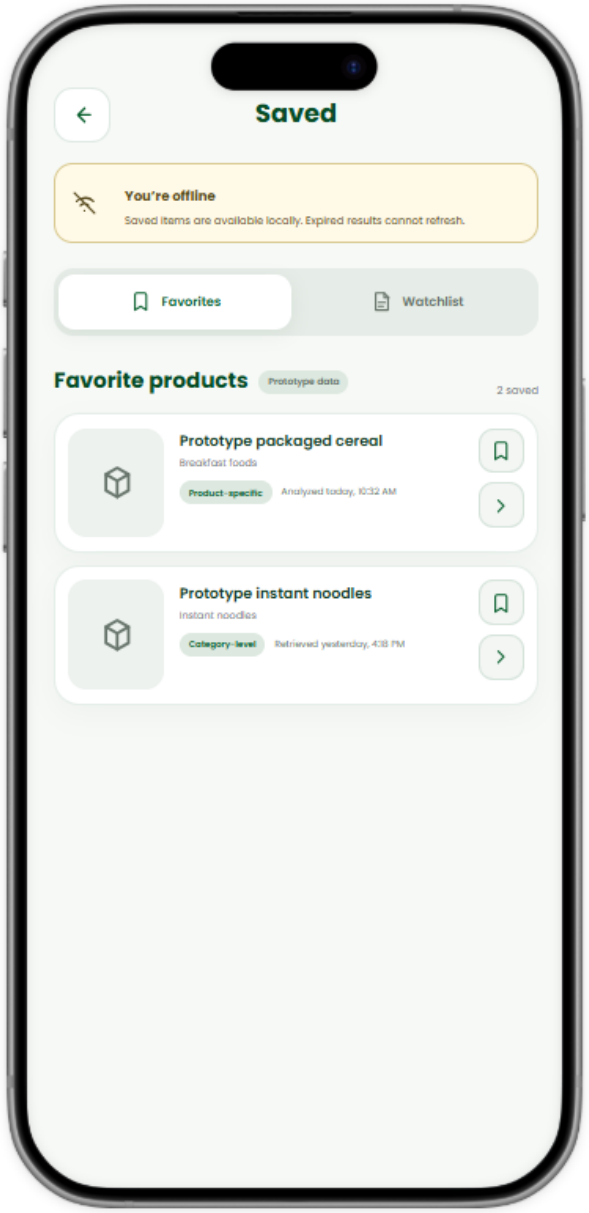

16.2 Empty Favorites

Purpose: Explain that no favorite products have been saved and provide shortcuts to search or scan for products.

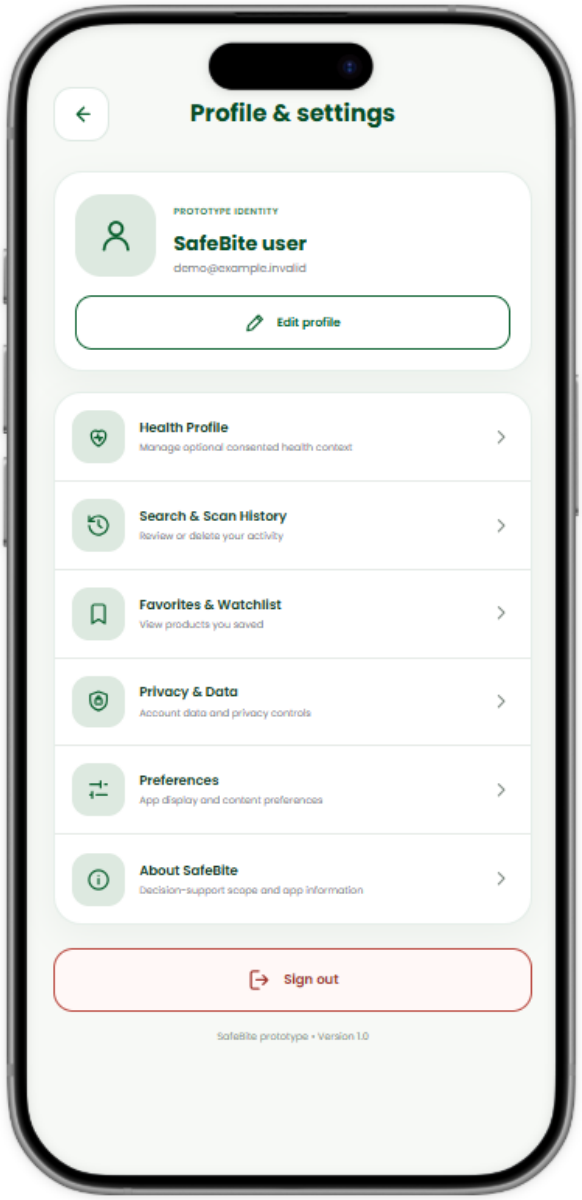

16.3 Offline

Purpose: Show locally saved favorite products while offline and indicate that expired results cannot be refreshed.

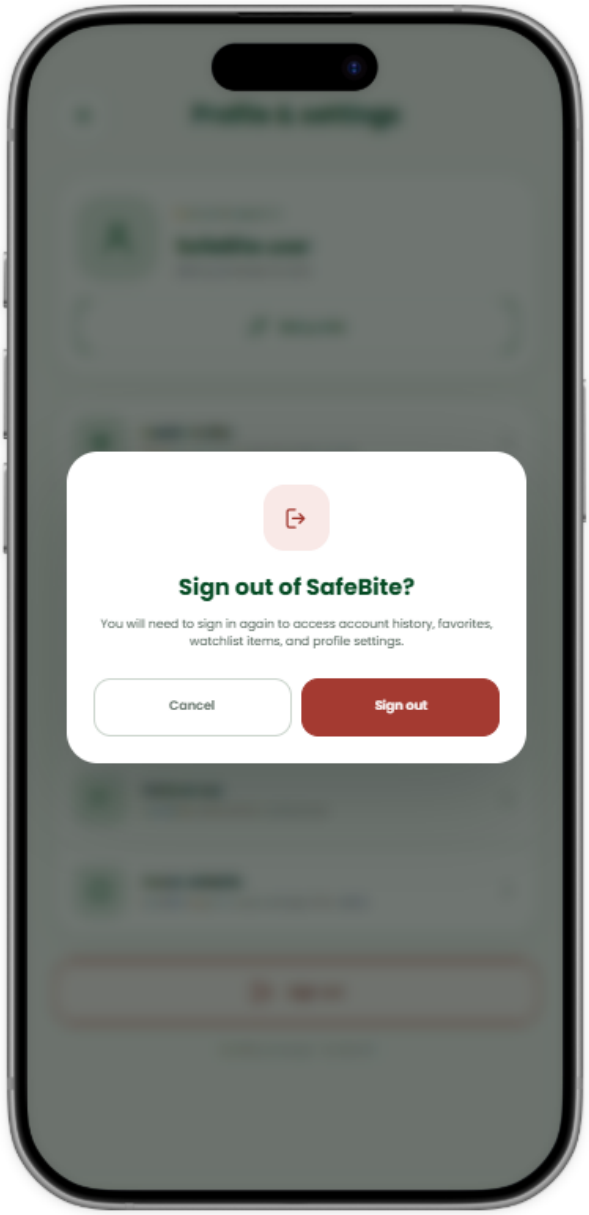

17 Profile & Settings

Purpose: Account and preferences

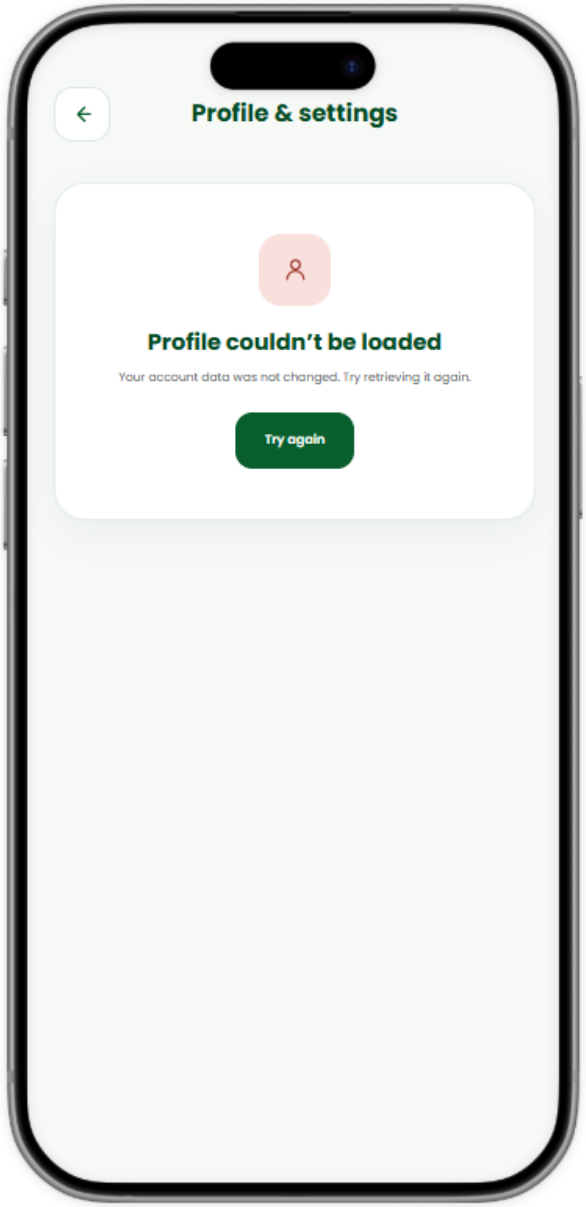

17.1 Sign Out Confirmation

Purpose: Confirm the user intends to sign out before ending the current session.

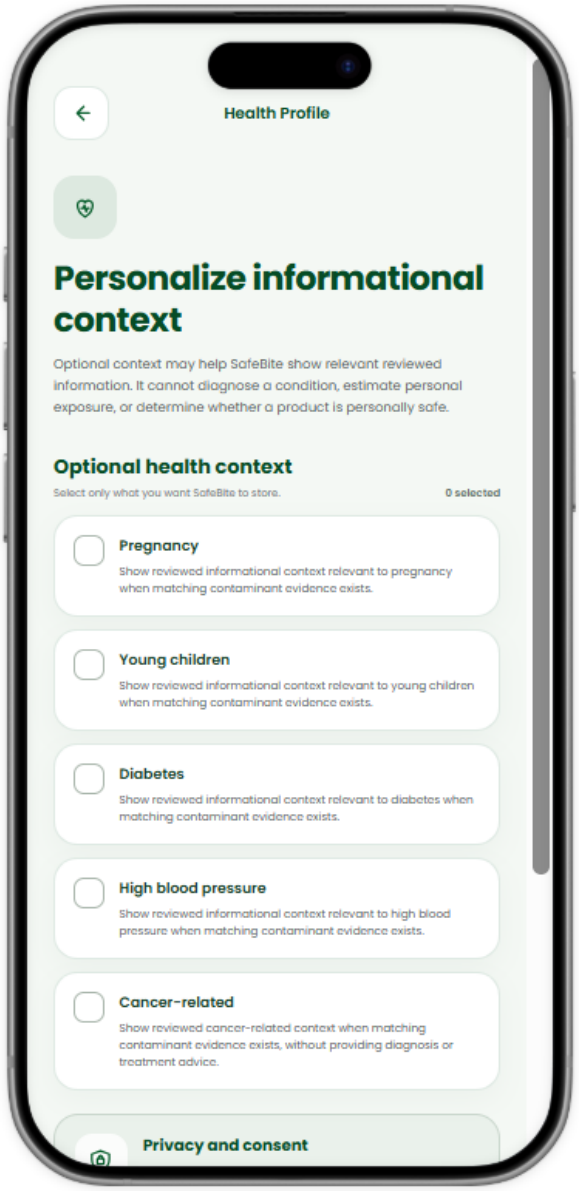

17.2 Offline

Purpose: Show when profile settings cannot be loaded while offline and offer a retry after connectivity returns.

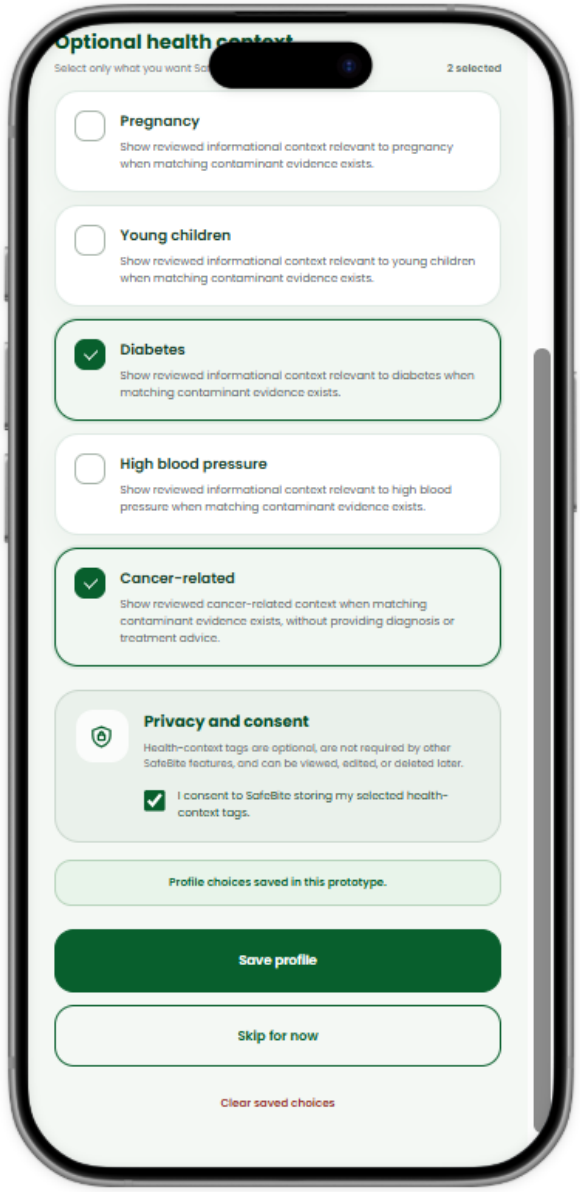

18 Health-Context Consent & Tags

Purpose: Optional personalization

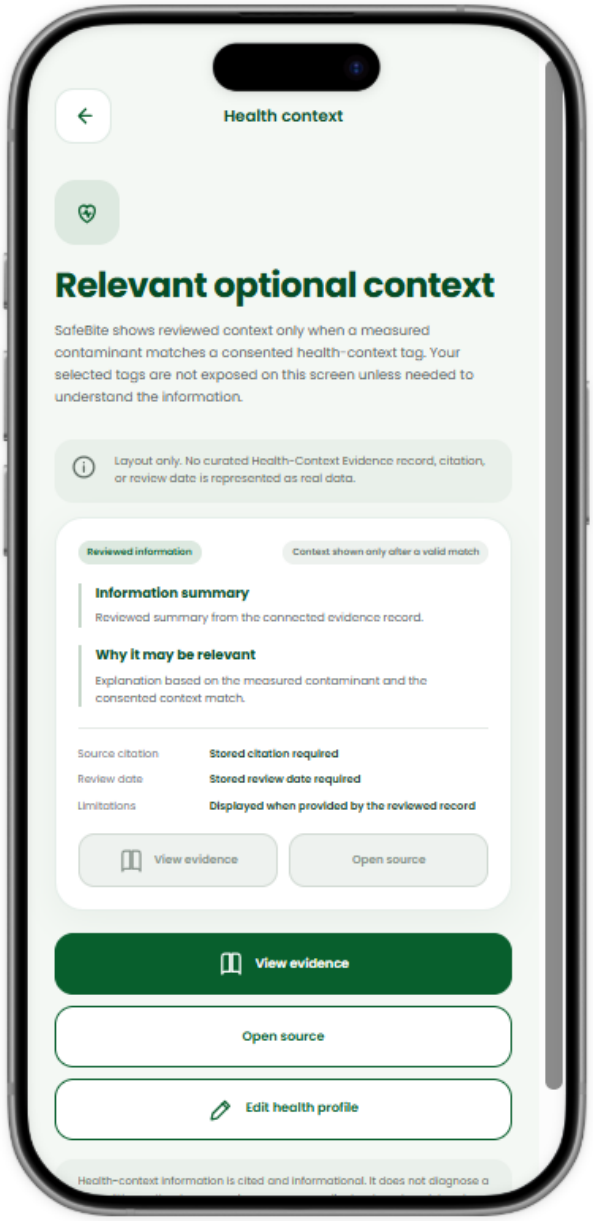

18.1 Scrolled View

Purpose: Continue the Health-Context Consent and Tags screen below its initial viewport.

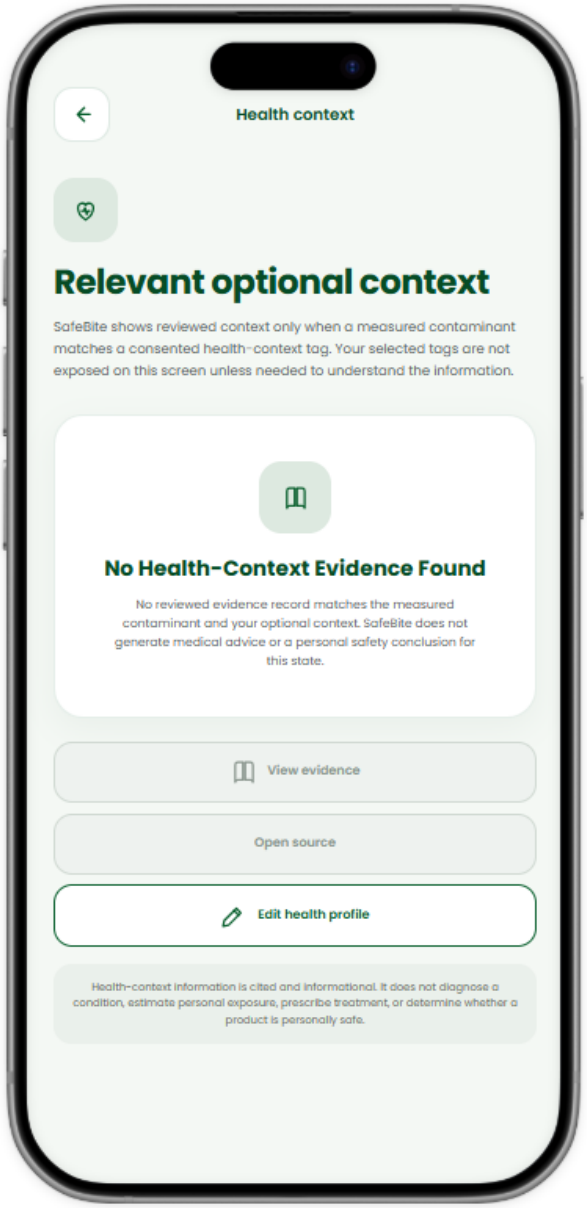

19 Health-Context Interpretation

Purpose: Relevant reviewed information

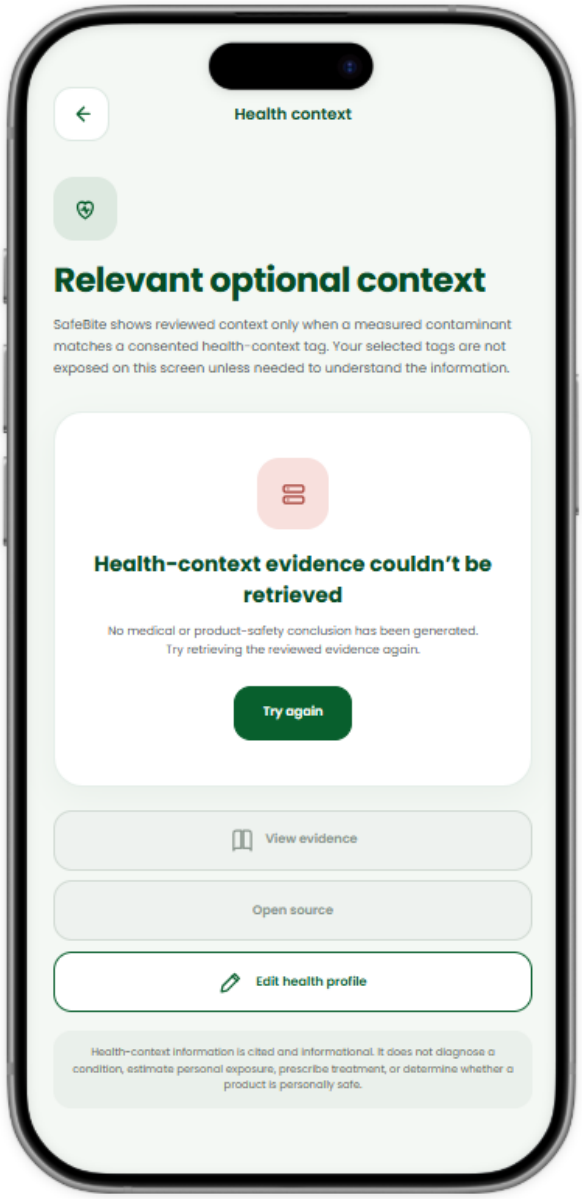

19.1 No Matching Evidence

Purpose: Explain when no evidence relevant to the user's health context is available for interpretation.

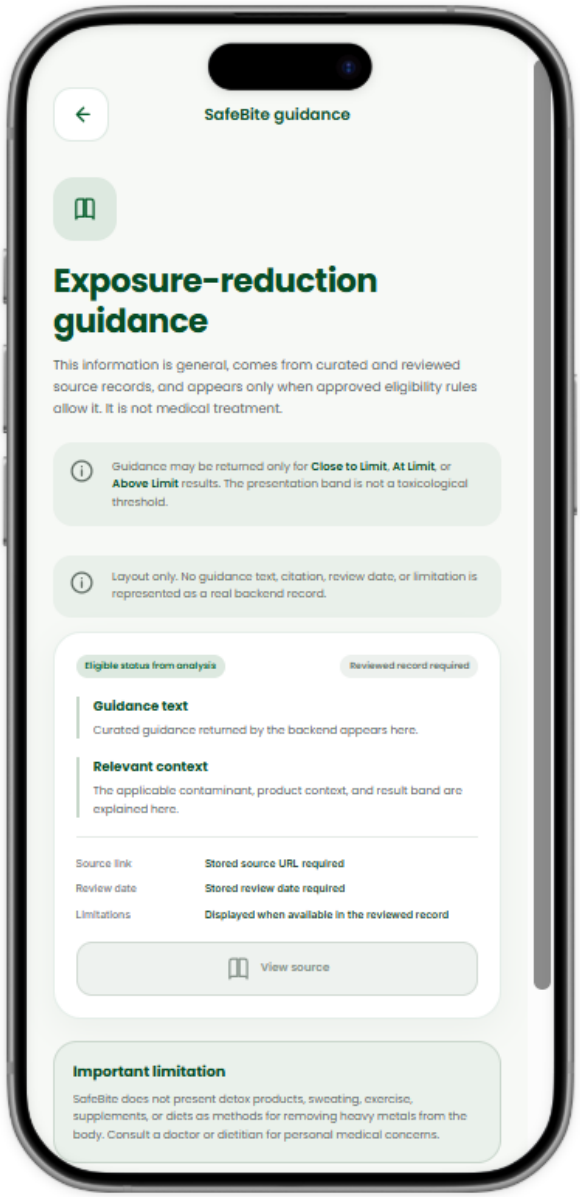

19.2 Retrieval Error

Purpose: Explain when health-context information could not be retrieved and offer a retry option.

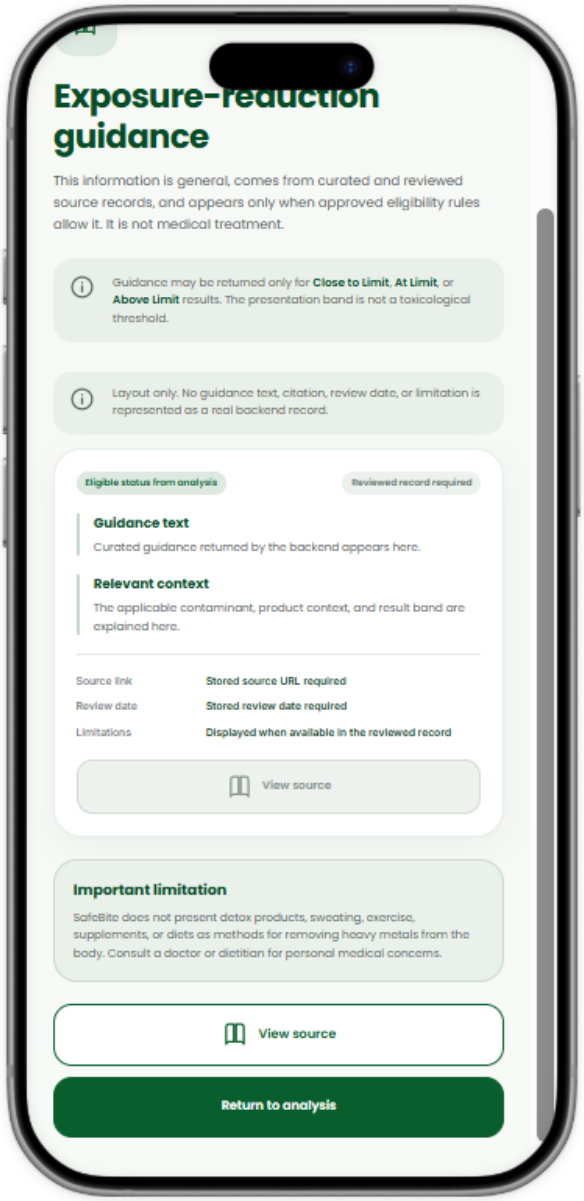

20 Exposure-Reduction Guidance

Purpose: Eligible curated guidance

20.1 Scrolled View

Purpose: Continue the Exposure-Reduction Guidance content below its initial viewport.

20.2 Retrieval Error

Purpose: Explain when eligible exposure-reduction guidance could not be retrieved and offer a retry option.
